

No. 37

JUNE 1992

COMMISSION
OF THE EUROPEAN
COMMUNITIES

EUROBAROMETER

PUBLIC OPINION IN THE EUROPEAN COMMUNITY

HIGHLIGHTS

"Maastricht" is important to Europeans

- * Among the 44% of EC citizens who, in March-April 1992, have "recently heard anything" about the Treaty of Maastricht, 75% believe it to be "important" or even "very important" and 54% think it will have "a positive effect for their country".

The construction of Europe should proceed more quickly

- * In all European countries except Denmark, people on average want to speed up the construction of Europe.

The 4 "standard indicators", showing support for the Community, have declined, but support still remains high

- * 76% of Europeans are for efforts being made to unify Western Europe; 65% think EC membership is "a good thing" and 53% say their country has benefited from its EC membership; 48% "would be very sorry" if the EC were to be scrapped.

EC citizens are very much in favour of the Single Market having a social dimension

- * An absolute majority of people interviewed in each Community country say that the social dimension of the Single Market is "a good thing".

The European public strongly supports the idea of a common foreign policy and a common defence/security

- * 59% and 70% of EC citizens respectively are in favour of "as a Political Union, the EC being responsible for foreign policy towards countries outside the EC" and "a common policy in matters of security and defence". There is a relative or absolute majority in this respect in each country of the Twelve.

Should EC residents in another EC country have the right to vote ? Views are mixed

- * 47% (versus 46%) of people interviewed agree that an EC citizen residing in another EC country should have the right to vote at local elections in that country and 68% (versus 24%) agree that people should have the right to vote at European Parliamentary elections in that country. These results vary a great deal from country to country.

EC citizens are largely in favour of EFTA countries enlarging the Community

- * An absolute majority of citizens in all EC countries are in favour of EC membership for Sweden (EC12 average: 80%), Switzerland (79%), Norway (78%), Finland (77%), Austria (77%) and Iceland (71%).

Europeans are very preoccupied by environmental protection and want it to become a Community area of responsibility

- * At least seven out of ten citizens in all Community countries think that protecting the environment and fighting pollution are "an immediate and urgent problem..."
- * ... and at least six out of ten support decisions on this issue being taken jointly within the Community, rather than at the national government level.

NOTE

EUROBAROMETER public opinion surveys ("standard EUROBAROMETER surveys") have been conducted on behalf of the Directorate General Audio-Visual, Information, Communication, Culture of the European Commission each Spring and Autumn since Autumn 1973 (EB N°0). They have included Greece since Autumn 1980, Portugal and Spain since Autumn 1985 and the former German Democratic Republic from Autumn 1990 onwards.

An identical set of questions was put to representative samples of the population aged fifteen and over in each member state. The regular sample in standard EUROBAROMETER surveys is 1000 people per country except Luxembourg (500) and the United Kingdom (1000 in Great Britain and 300 in Northern Ireland). In order to monitor the integration of the five new Länder into Germany and the European Community, 2000 persons have been sampled there since EUROBAROMETER 34: 1000 in East Germany and 1000 in West Germany.

Until EUROBAROMETER No 31, surveys were carried out by national institutes belonging to "European Omnibus Surveys" (EOS-Gallup Europe). "Faits et Opinions", Paris, working with the Commission's "Surveys, Research, Analyses" Unit was responsible for finalisation of questionnaires, international coordination and the initial statistical analyses of the data. The surveys from No 32 onwards have been carried out by national institutes associated with the "INRA (EUROPE) European Coordination Office", Brussels.

All institutes involved were selected by tender. They are all members of the "European Society for Opinion and Marketing Research" (ESOMAR) and comply with its Standards.

The figures given for the Community as a whole, which are shown in this document, are weighted on the basis of the adult population in each country. Unless otherwise specified, tables show percentages. In certain case, percentages do not always add up exactly to 100%, but a number very close to it (e.g. 99 or 101), because of rounding. When questions allow for several responses, percentages also often add up to more than 100%.

In accordance with normal practice for this type of survey, the Commission disclaims all responsibility for questions, results and commentaries. This report, which was drawn up by the "Surveys, Research, Analyses" Unit of the Directorate-General Audio-Visual, Information, Communication, Culture is an internal working document of the Commission of the European Communities.

Some of the results presented here have already been distributed by the publication of an Early Release (2nd May 1992). The sections and paragraphs of this report which have already been published are annotated in the margin by the sign

Detailed tables on series of trend variables, some of which go back to 1962, formerly published as Appendix B or Volume II of the EUROBAROMETER report, twice a year, are being published annually, since March 1991, as "EUROBAROMETER TRENDS".

1. THE EUROPEAN COMMUNITY TODAY¹

1.1 Importance of European affairs - and learning about them

Since the Maastricht summit of 9-10 December, where the Heads of State or Government adopted a major treaty leading towards European Union - one part aimed at Political Union, the other at Economic and Monetary Union - Community politics are more than ever at the forefront of the news. This adoption was only intended to mark, in fact, the beginnings of long debates by the national parliaments of the 12 member states from now until the end of 1992 to decide on the ratification of the two treaties.

At the time of the referendum of 2 June 1992, the Danes rejected the Maastricht Accord by a small majority of 50.7%. This led to serious questioning about the realisation of the treaty, which cannot really enter into force until ratified by all member countries.

¹ Except where specifically mentioned, the data contained in this report come from the EUROBAROMETER N°37 survey (EB 37), conducted in March/April 1992 by INRA (EUROPE). For more technical details, see the Annexes.

EUROBAROMETER 37

A failure in the ratification of the Treaty on European Union would directly cast doubts on the approval of the "Delors II Package", which envisages an increase in EC resources for the period 1993-1997. This budgetary plan, which constitutes the implementation of Maastricht, is justified by the need to increase the financial means of the EC, in order to be able to fulfil the commitments foreseen in the Treaty.

In addition to this "internal" difficulty facing the European Community are the problems of foreign policy (the latter is not yet a Community responsibility, but the Maastricht Treaty envisages taking a decisive step in that direction, granting the EC a common security and foreign policy and, in the long term, a common defence policy). For a number of months now, Europeans have been confronted with the Yugoslav crisis where - despite repeated attempts - they have been powerless to make ceasefires hold and, through these means, impose a European peace.

In Chapter 3 - devoted to Political, Economic and Monetary Union - awareness of Maastricht as well as the importance and anticipated effects of this Accord will be analysed in more detail.

Despite the omnipresence of Maastricht in the media, the proportion of people having "recently heard or read something about the European Community or the European Economic Community" has diminished since the last EUROBAROMETER (EB 36 Autumn 1991) in almost all member states.

The only countries not to have shown a decline are Denmark, where there is a 4 point increase (perhaps due to the vast information campaign which has accompanied the debate concerning the ratification of the Maastricht Treaty, on which the Danes voted on 2 June) as well as Ireland and East Germany where, statistically, there is no change (respectively -1 and +1). Depending on the country, the declines vary from 1-3 points (Ireland, Portugal, France) to more than 10 points (Greece, Spain); at the Community level, the decline is 7 points (from 73% to 66%) (Table 1.1.1).

A large element of the explanation for this apparent paradox lies in the fact that EC citizens do not necessarily associate the Maastricht Treaty with the EC :

- * among those interviewed who agree that they have not recently heard about the EC, 27% say they have "recently heard about the summit of the Heads of State or Government of the EC at Maastricht in the Netherlands, or about the signing of the Treaty of Maastricht on European Union" (68% say they have not recently heard and 6% do not comment);
- * 75% of those interviewed (from 65% in Spain, 71% in the United Kingdom up to 85%-87% in East Germany, Denmark and the Netherlands) declare they have heard either of the EC, or the Maastricht Treaty, or indeed both of them. By contrast, 66% and 44% respectively say they have heard of the EC and "Maastricht" (Table 1.1.2 and 3.3).

If awareness of the EC varies widely from country to country (from 58%-60% in the United Kingdom, Spain and Ireland to 78%-79% in Portugal and Denmark (up to 81% in the East Germany)), it differs just as much among socio-demographic variables. As Tables 1.2 and 1.3 show, this awareness :

- * climbs with "media usage" ²;
- * is higher among men than women (men's "media usage" is, on the whole, more significant than women's)
- * is weaker among 15-24 year olds and greater among 40-54 year olds (these two age groups are also those whose "media usage" is respectively weakest and strongest);
- * increases, like "media usage" with education;
- * grows, like "media usage", with the degree of opinion leadership (definition: see Annexes);
- * augments, as "media usage" does, with income level.

Whether they had heard or not about the EC, the citizens of the Twelve were asked whether they were happy in the way television, the press, the government etc. "deal with Europe" in their country. Replies to this question should, above all, allow us to understand better the way in which EC citizens receive messages about Europe and its construction ³ (Table 1.4, Figure 1.1.).

Globally, television and the press satisfy Europeans most often : 59% (versus 30%) are "fairly satisfied" with the role played by television and 57% (versus 28%) are "fairly satisfied" with that played by the press. The slight preference for television is not general: the written press is most frequently cited in Denmark, Luxembourg, the Netherlands and above all France.

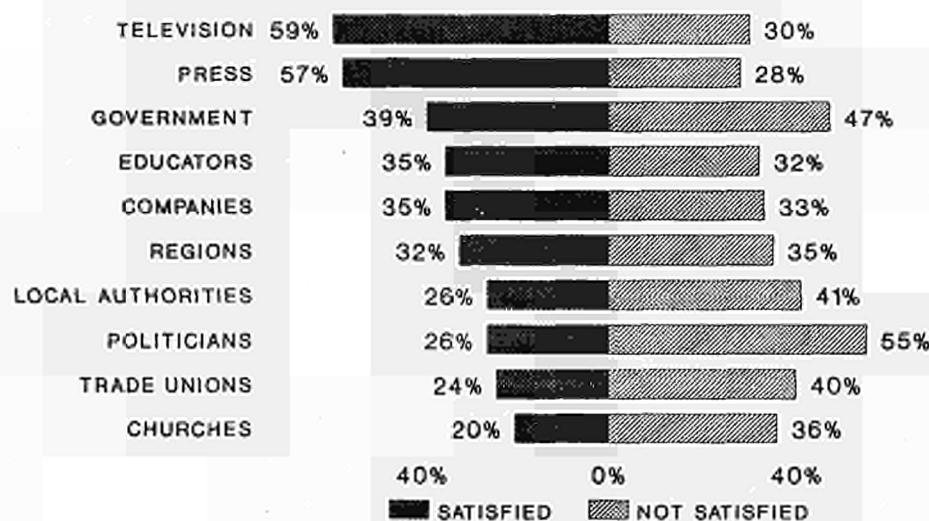

As Europe is also a cultural entity, which exists in people's minds, when the media *speak of* Europe, the media are perceived by individuals as having at least partly the facility to *shape* Europe, making it visible and concrete.

² "Media usage" is an index - its construction is shown in the Annexes

³ This question forms part of a study undertaken on behalf of the Sociological Department of Nantes University in the framework of a research programme on the sociology of European integration. More detailed results can be obtained from that department.

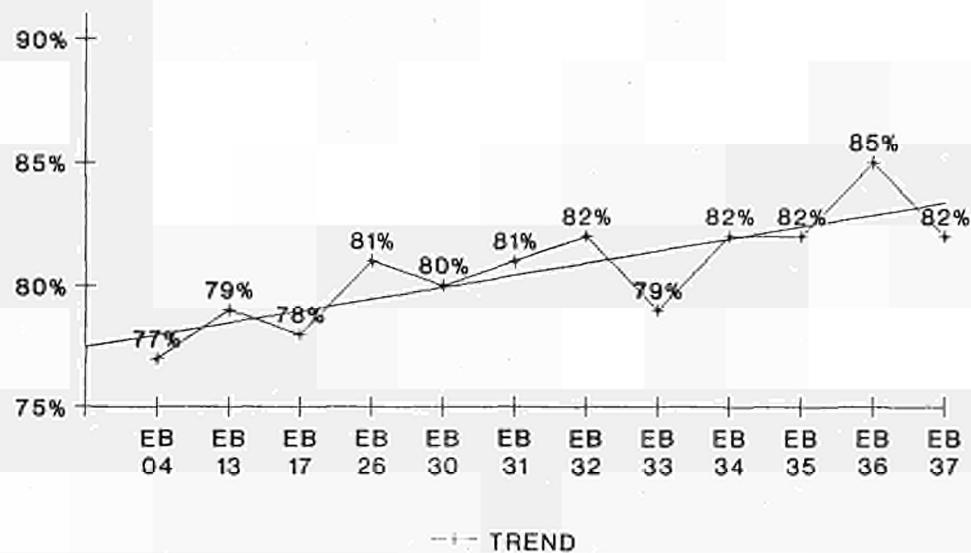

EUROBAROMETER 37

SATISFACTION WITH THE WAY PEOPLE AND INSTITUTIONS DEAL WITH EUROPE - EC 12

EUROBAROMETER 37 - FIGURE 1.1.

IMPORTANCE OF EC MATTERS FOR THE FUTURE OF OUR COUNTRY AND OUR FELLOW CITIZENS - EC 12 TREND

EUROBAROMETER 37 - FIGURE 1.2.

To a lesser extent than the media (32%-39% "fairly satisfied"), Europeans recognise that other types of institutions - as much political as economic and educational - also have their uses. Teachers and lecturers (35% "fairly satisfied" versus 32% "fairly dissatisfied"), companies (35% versus 33%) and regions (32% versus 35%) are perceived having an active role; perceptions of governments are more varied, and dissatisfaction predominates (47% "fairly dissatisfied" versus 39% "fairly satisfied"). The relatively positive perceptions Europeans have of business people, teachers and lecturers and representatives of **regional** policies (noting the difference between satisfaction concerning "regions" on the one hand and "local authorities" on the other) is linked perhaps to the fact that these players are more "concrete" and closer to citizens.

The strongest level of dissatisfaction is aimed at politicians. 55% (versus 26%) of Europeans say they are "fairly dissatisfied" in the way politicians "deal with Europe". Even if it is constructed by policy (policies), it is precisely through the politicians' language that the idea of Europe comes across with the greatest difficulty.

The citizens of Northern European countries, particularly Belgium, Denmark, the Netherlands and the United Kingdom, as an extension of their political culture, show satisfaction mainly with both companies and government, with higher marks for companies (40-50% "fairly satisfied" versus 19%-24% "fairly dissatisfied").

This group of countries is in contrast to France, which combines companies and regions, as well as West Germany, where the trio of companies/regions/teachers has the upper hand. On this point, one sees coming together West Germany, where regions have a strongly-founded political reality, and France, where regions are progressively regaining their importance.

Local structures occupy the choicest place in Greece and Ireland compared to other countries; in Portugal and Spain, locality and region pick up a very similar degree of satisfaction and occupy a privileged position, always relative to other countries.

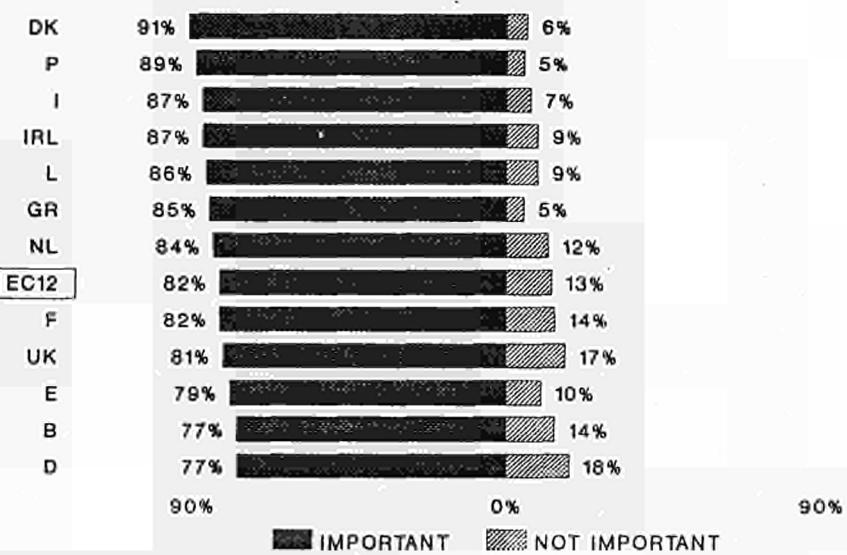

Lastly we have the case of East Germany, characterised by a strong degree of "Don't know/No response", and Italy, characterised by a well-defined aloofness towards political institutions and politicians, a distance (largely shared with France) which no shift of confidence in the positive role of other organisations has counterbalanced. It is in this latter country where the weakness of institutional language concerning Europe appears strongest.

Satisfaction, as criticism of the players and organisations which are "making Europe", seems to be linked to national cultural norms and to their relations with institutions dealing with them.

In this, the views of the Irish are always more frequently favourable, whichever topic is being dealt with, and those of the French and Italians are the most frequently critical. These cultural traits force one to read more methodically and cautiously these views of satisfaction or dissatisfaction towards specific institutions (especially governments) which one is tempted to analyse in isolation, or only in reference to the overall political situation.

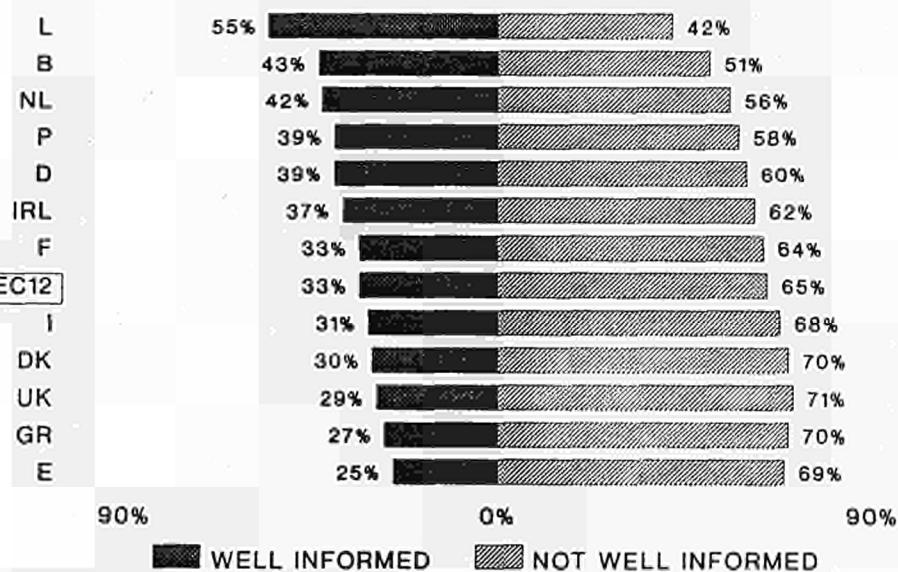

EUROBAROMETER 37

IMPORTANCE OF EC MATTERS FOR THE FUTURE OF OUR COUNTRY AND FELLOW CITIZENS - BY COUNTRY

EUROBAROMETER 37 - FIGURE 1.3.

FEELING WELL OR NOT WELL INFORMED ABOUT THE EC ? -BY COUNTRY

EUROBAROMETER 37 - FIGURE 1.4.

Even if these attitudes of satisfaction/criticism regarding the players and organisations which "deal with Europe" vary a great deal and directly depend on the type of player and organisation concerned, it is no less true that 82% of interviewees believe EC matters to be important and even very important for the future of their country and its citizens; only 13% think the opposite and 6% do not comment.

In EUROBAROMETERS (EB) 32, 34 and 35, 82% had also responded "very important/important"; in EB 36, the proportion of these answers reached their highest level, 85% (Table 1.5, Figures 1.2 and 1.3).

Denmark (91%, an increase of +2 points compared with EB36) and Portugal (89%, +3 points, the greatest increase along with Greece) had the highest percentages of "very important/important" responses; West Germany (76% -8 points, the only country falling more than 5 points) and Belgium (77% +1 point) had the lowest.

If, more than three out of four people questioned in all member countries reckon that EC matters are important and even very important for the future of their country and their fellow citizens, by contrast 65% among them feel not very well or not at all well informed about them (even if, as indicated above, 66% have recently heard about the EC). Depending on individual countries, this percentage rises from 42% (Luxembourg) to 70-71% (Denmark, Greece and the United Kingdom); although it is 56% in West Germany, it climbs to 75% in East Germany (Table 1.6, Figure 1.4.).

This lack of information shows up in a major way when one looks at the results of a question asked to measure the level of knowledge among the citizens of the Twelve concerning the very broad and very complicated topic of the Community's political life: "In which cities are the following institutions of the European Community located: a) the European Commission, b) the European Parliament, c) the Council of Ministers representing the governments of the member states; d) the Court of Justice of the European Community" ⁴ (Table 1.7.1).

In reality, 55% and 54% of Europeans respectively locate the headquarters of the European Parliament and the European Commission correctly. For Parliament, correct replies vary between 32%-48% (Spain, Greece, United Kingdom) and 75%-82% (Denmark, Luxembourg); and for the Commission, between 38%-50% (Spain, Italy, United Kingdom) and 78%-80% (Belgium, Denmark). For these two institutions, the level of "Don't know/No response" is 33%.

⁴ The following answers have been deemed correct for the Commission, the Parliament, the Council and the Court respectively: a) "Brussels"; b) "Brussels and/or Luxembourg and/or Strasbourg"; c) "It depends"; and d) "Luxembourg". All other responses have been judged incorrect.

EUROBAROMETER 37

The Court of Justice and Council of Ministers respectively are located correctly by 20% and 17% of Europeans interviewed. Once again, the average for the Community hides very major differences among various member countries. For the Court of Justice, the percentage goes from a high of 72% in Luxembourg (which is the host country for this institution) to 34% in West Germany... and to 8%-12% in the United Kingdom and Spain; for the Council of Ministers, it is - always in descending order - from 39% in Luxembourg, 33% in Portugal (which, for the period from 01/01/92 to 31/06/92 is assuming the Presidency of the Council (see below, Section 1.4), ... and 5%-9% in the United Kingdom and Spain. The level of "Don't know/No response" is 52% for the Court of Justice and 59% for the Council of Ministers.

Taking these four institutions together, 31% of people interviewed (from 8%-11% in Denmark, Luxembourg and Belgium up to 55% in Spain) did not locate any institution correctly, and 8% (from 28% in Luxembourg, 14-16% in West Germany, Portugal and Belgium ... to 2% in the United Kingdom) located them all correctly (Table 1.7.2).

Among the 66% of Europeans who say they have heard something recently about the EC or EEC (see above), 21% cannot correctly place any of the four institutions while 11% can place them all; among those who have not heard something recently, the percentages are 51% and 4% respectively. With these and the previous results (see Tables 1.1 and 1.2) it is logical to suppose that the number of correct responses is directly linked to nationality, increases with "media usage", is higher among men than women, is weaker among 15-24 year olds and greater among 40-54 year olds, growing with education, income and "opinion-leadership" (Tables 1.7.3 and 1.7.4).

These figures should under no circumstances be considered as a global and objective measure of knowledge about the EC or its institutions. It throws additional light on this knowledge, an indicator which can supplement others found in EUROBAROMETERS.

To better define how the citizens of the Twelve understand the political life of the Community, they were asked to chose - among the Commission, the Parliament and the Council of Ministers - which institution among them "is the most powerful in terms of having the final say on European Community legislation". Community averages, in descending order, are (Table 1.8):

- * the Parliament : 29% ; percentages vary from 45% in East Germany, 34%-35% in the Netherlands and Belgium, ... to 21%-23% in the United Kingdom, Denmark and Ireland.
- * the Council of Ministers : 24% ; percentages vary from 34%-38% in Denmark, Luxembourg and the Netherlands, ... to 17%-19% in Greece, Italy and Spain.
- * the Commission : 17% ; percentages vary from 23%-27% in Denmark, the United Kingdom, France and Ireland, ... to 7% in Spain.

Thus the Parliament is perceived as having the right of final decision in Community legislative matters in the majority of member states (the two notable exceptions being Denmark and Luxembourg where the Council is very much ahead).

In fact, legislative initiative formally rests only in the hands of the Commission; and especially since the "institutionalisation" of the European Councils (via the Single European Act, which entered into force 01/07/87), the weight of the Council of Ministers is more than decisive in all the legislative process of the EC : the Council disposes of quasi-legislative powers⁵. As to the European Parliament, it does not yet play that key role in the political life of the Community which others would like to attribute to it (the Maastricht Treaty envisages, among other things, a broadening of the Parliament's powers).

With caution, one might explain the first position occupied by the European Parliament at least partially by the fact that it matches the idea that Europeans have of a Community **Parliament**. Other results presented in Chapter 4 (see below) allow us, in effect, to enhance this hypothesis :

- * 72% of Europeans would prefer that the European Parliament plays "about the same" role (16%) or a "more important" role (56%) than it does now, 9% want to confer a "less important" role and 18% do not comment (Table 4.5);
- * 55% of Europeans are for "the formation of a European Union with a European government responsible to the European Parliament", 20% are against and 25% do not comment (Table 4.7.1).

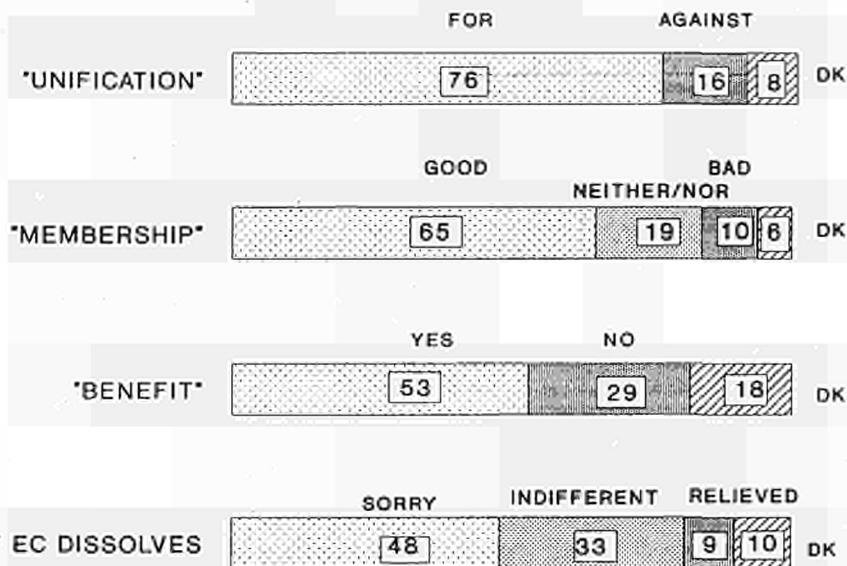

If one considers, on the one hand, the abundance of Community information distributed by EC institutions, the media as well as other institutions/organisations who, from near or far, "deal with Europe" and, on the other hand, the totality of the preceding results, one is forced to give in to the evidence that it is at least as much the quantity of information as the quality that gives a citizen the feeling of being well informed.

Community politics is complex and, at first sight, of little attraction. European institutions as well as the media seem to have difficulties finding a language which is suitable for "talking about Europe", which satisfies the information needs of EC citizens. Such a language cannot be developed without the collaboration of those same citizens : the Europe of the future is charted by the citizen: to make it happen, it will have to be done by and for them.

⁵ The European Council constitutes at the same time the "source of impetus" for the principal political initiatives of the EC and an "organ of arbitration" of litigious questions which have not been settled by the Council of Ministers

EUROBAROMETER 37

SUPPORT FOR EUROPEAN UNIFICATION AND THE EC - % EC12

EUROBAROMETER 37 - FIGURE 1.5.

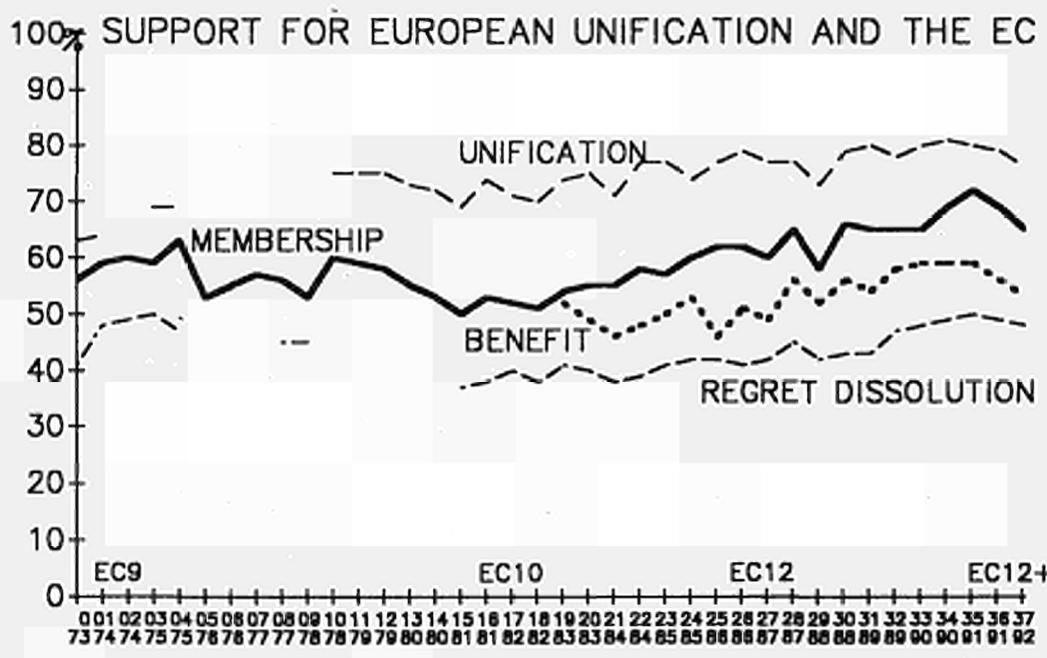

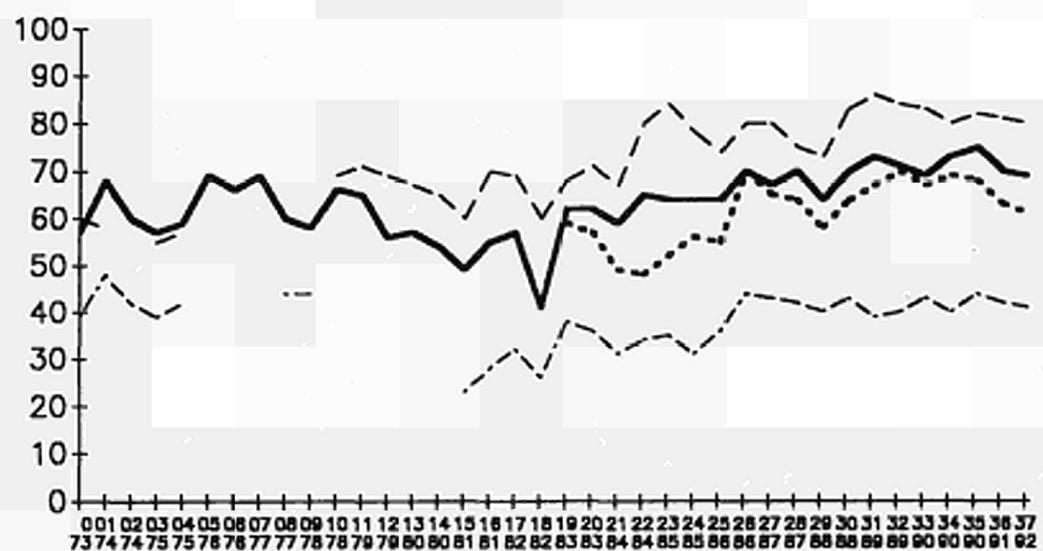

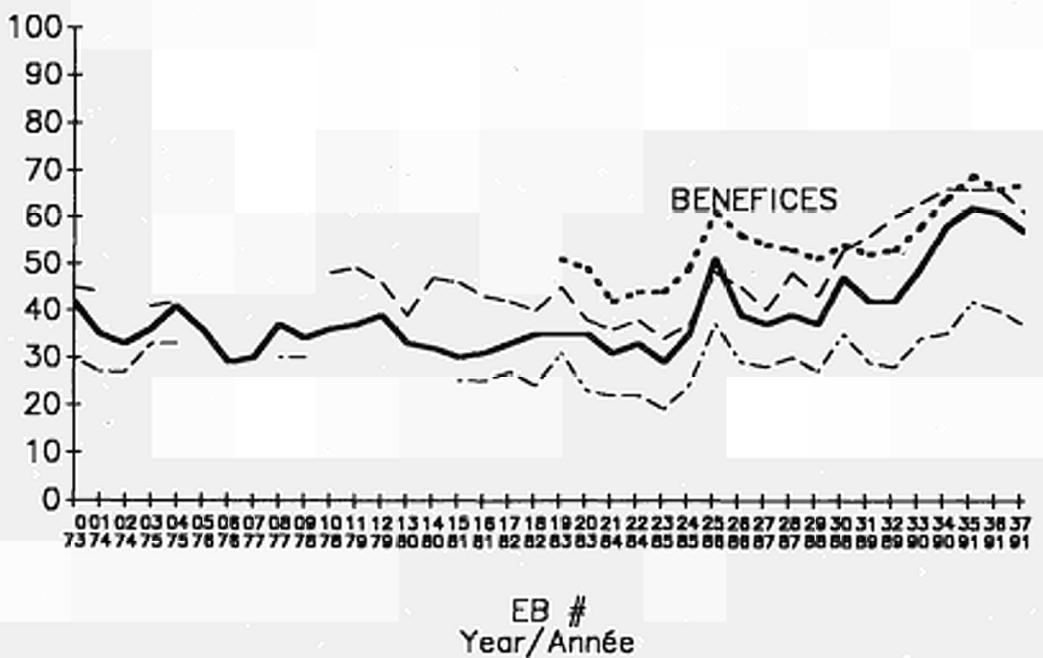

FIGURE 1.6.

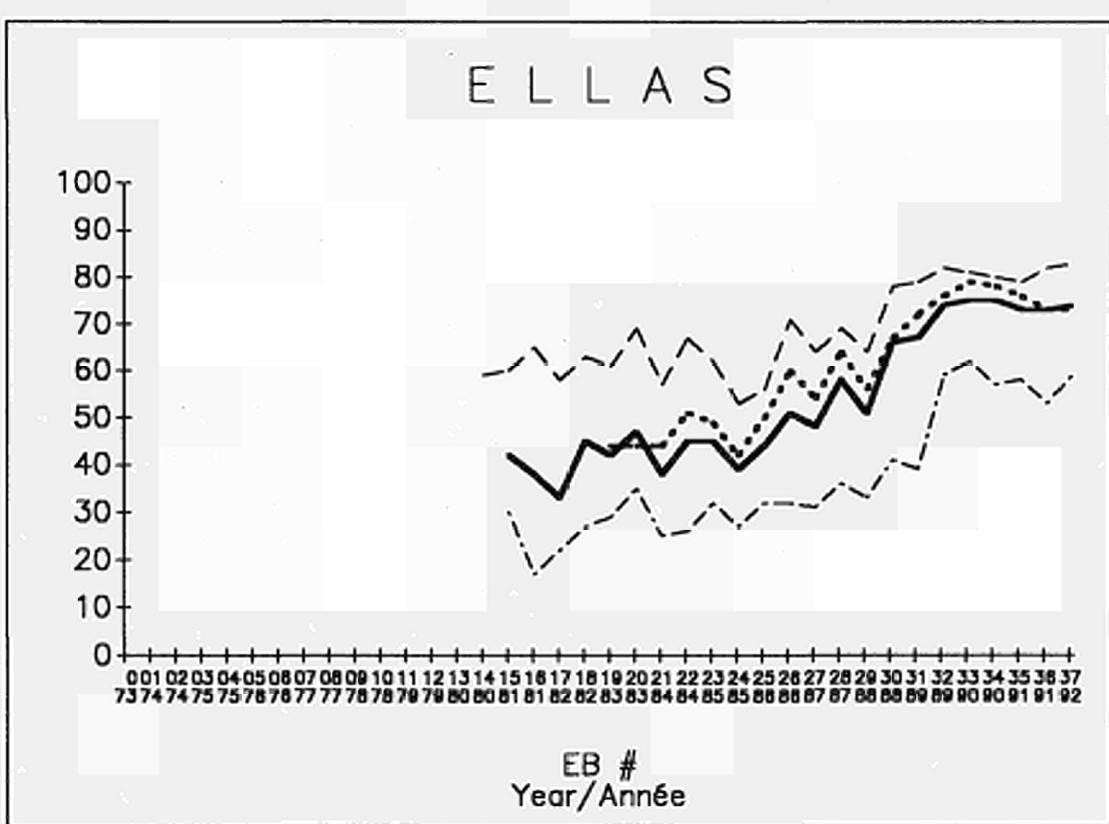

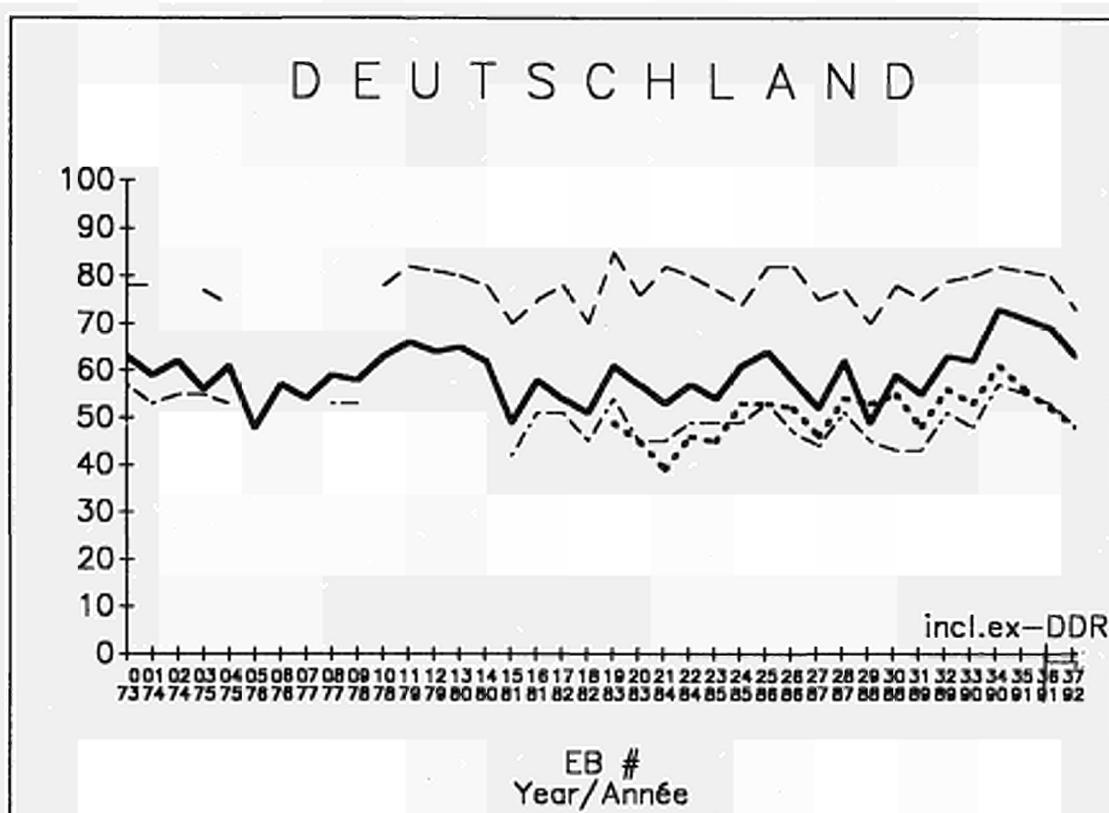

B E L G I Q U E

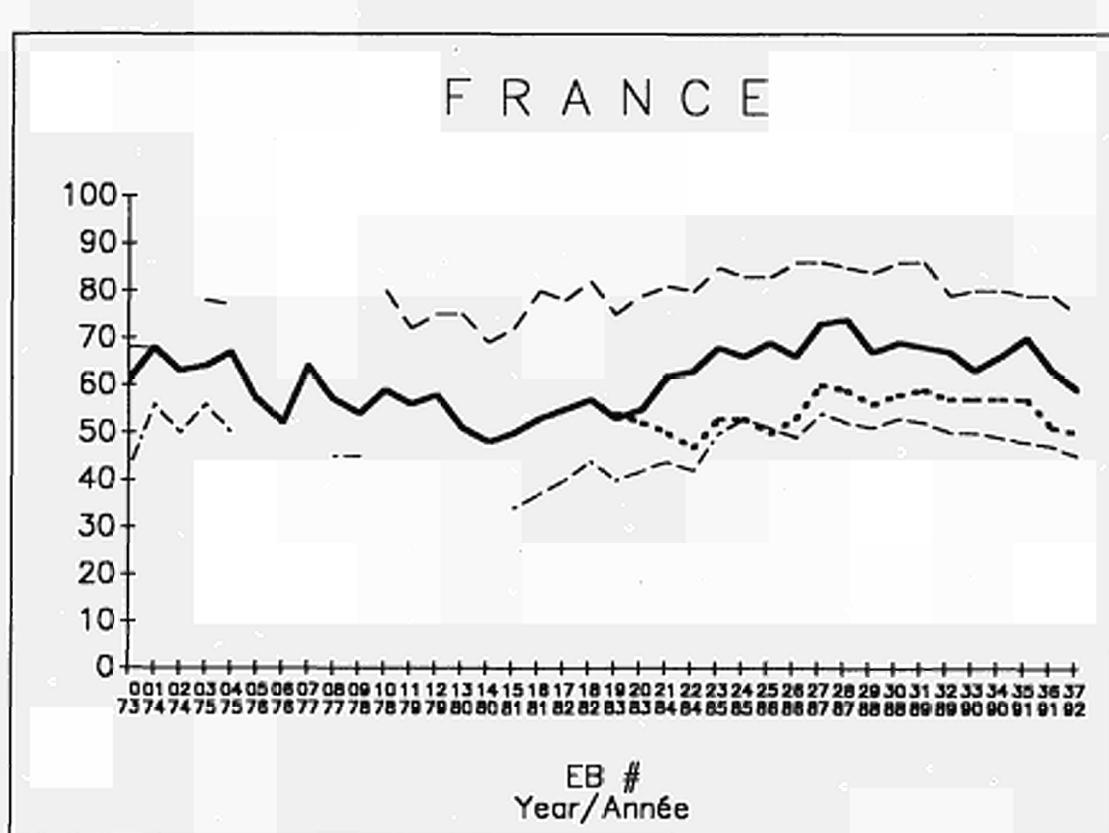

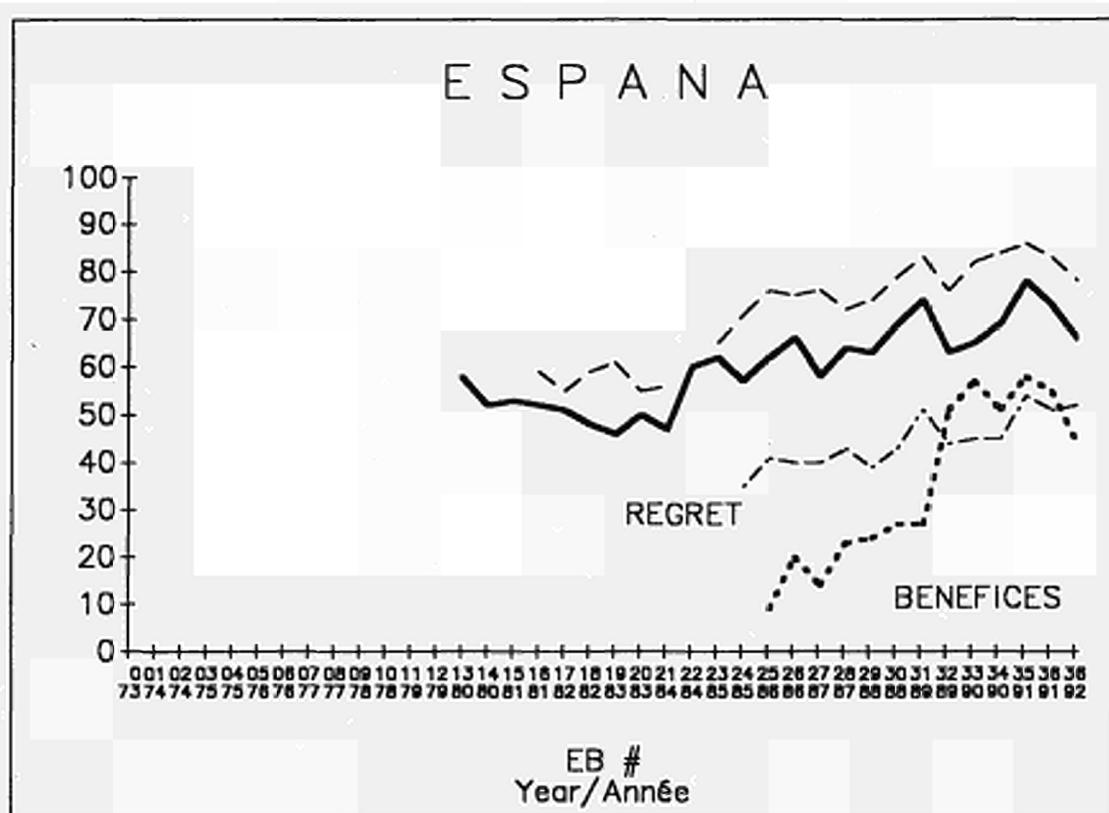

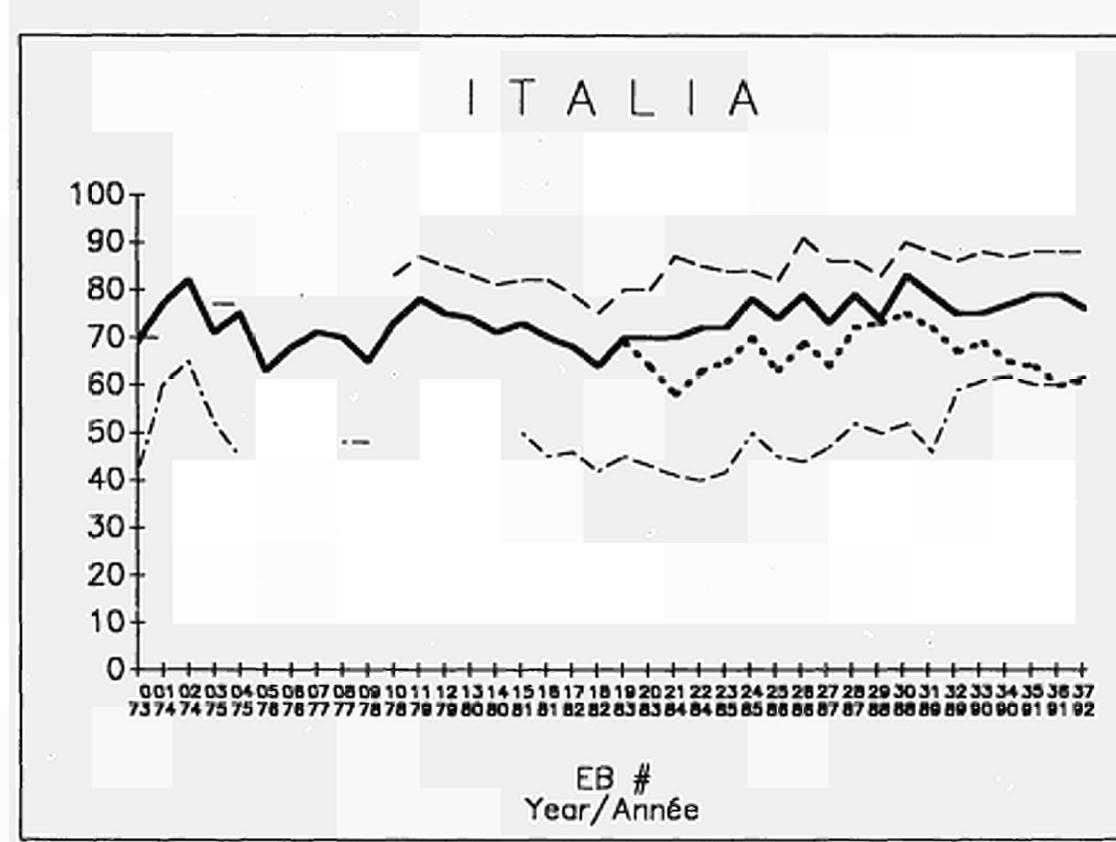

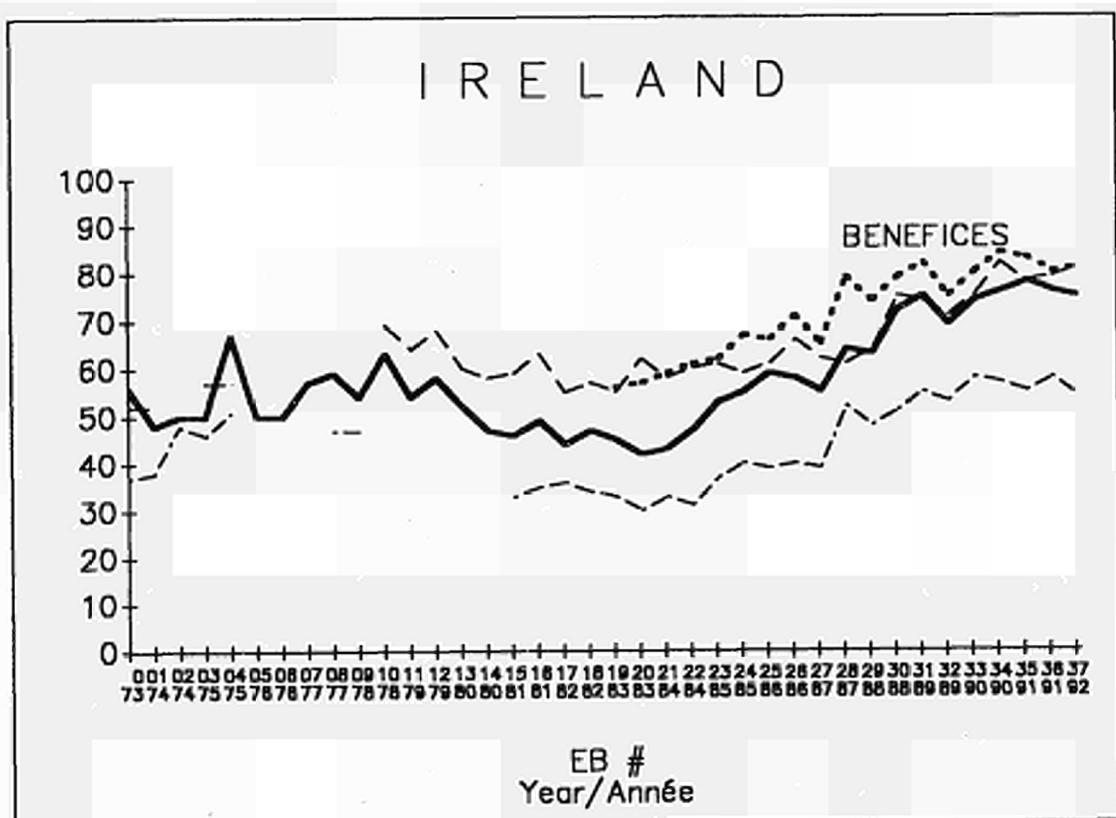

D A N M A R K

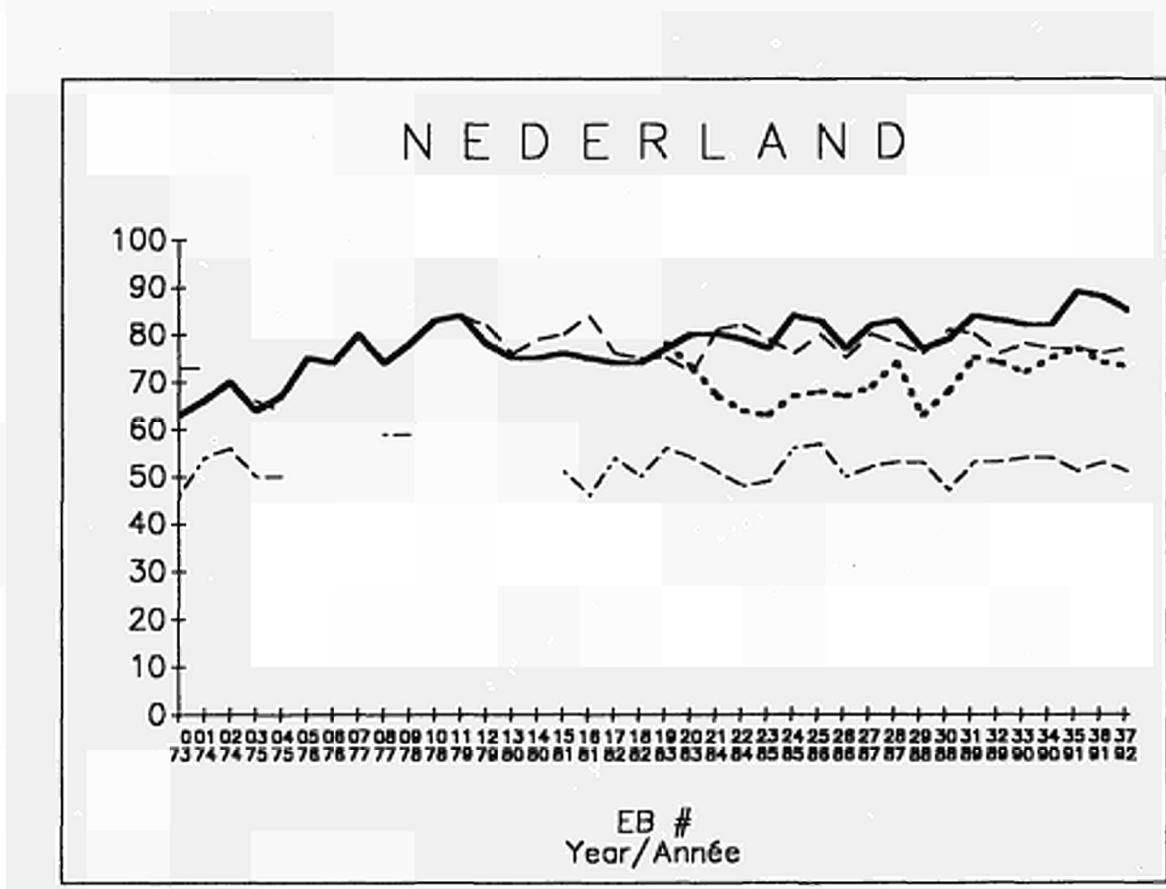

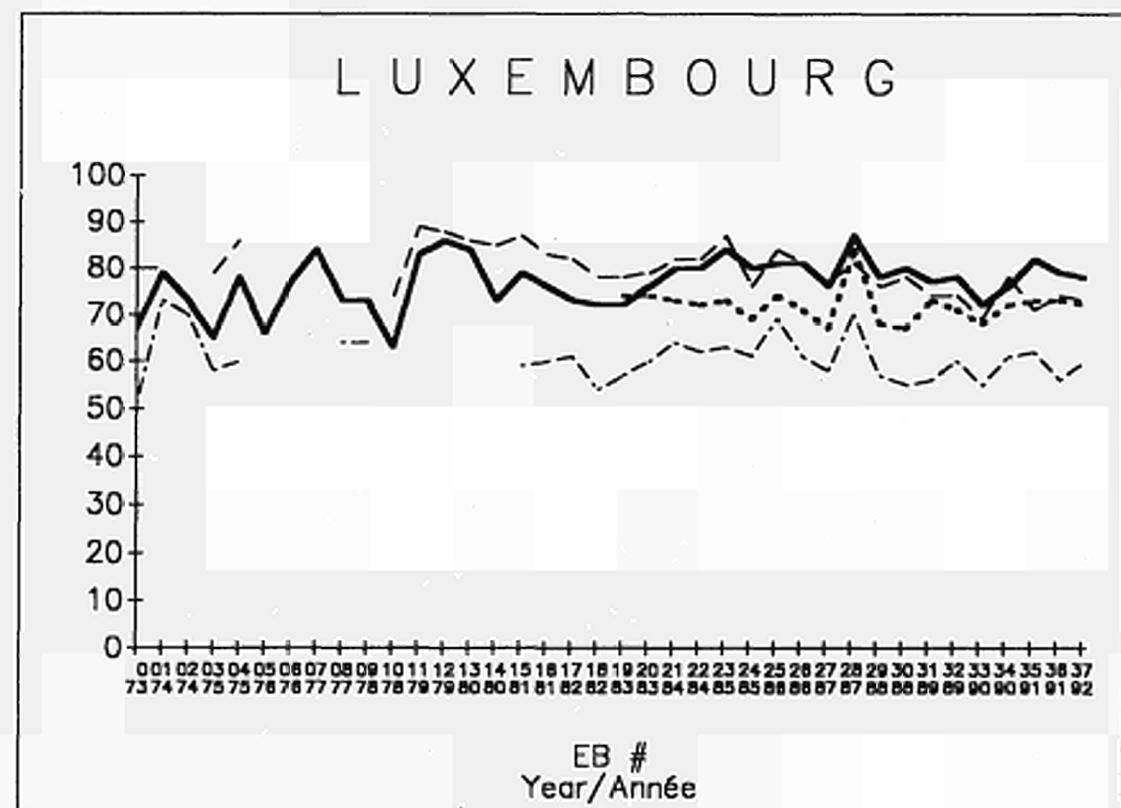

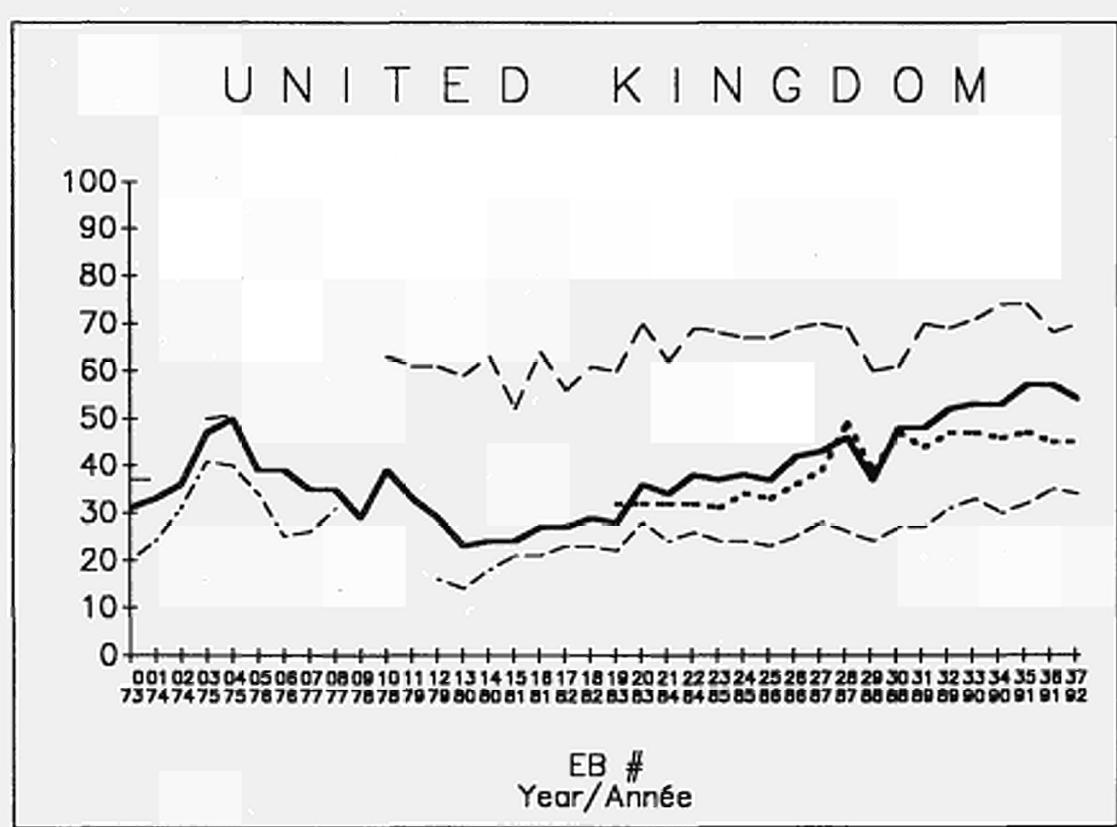

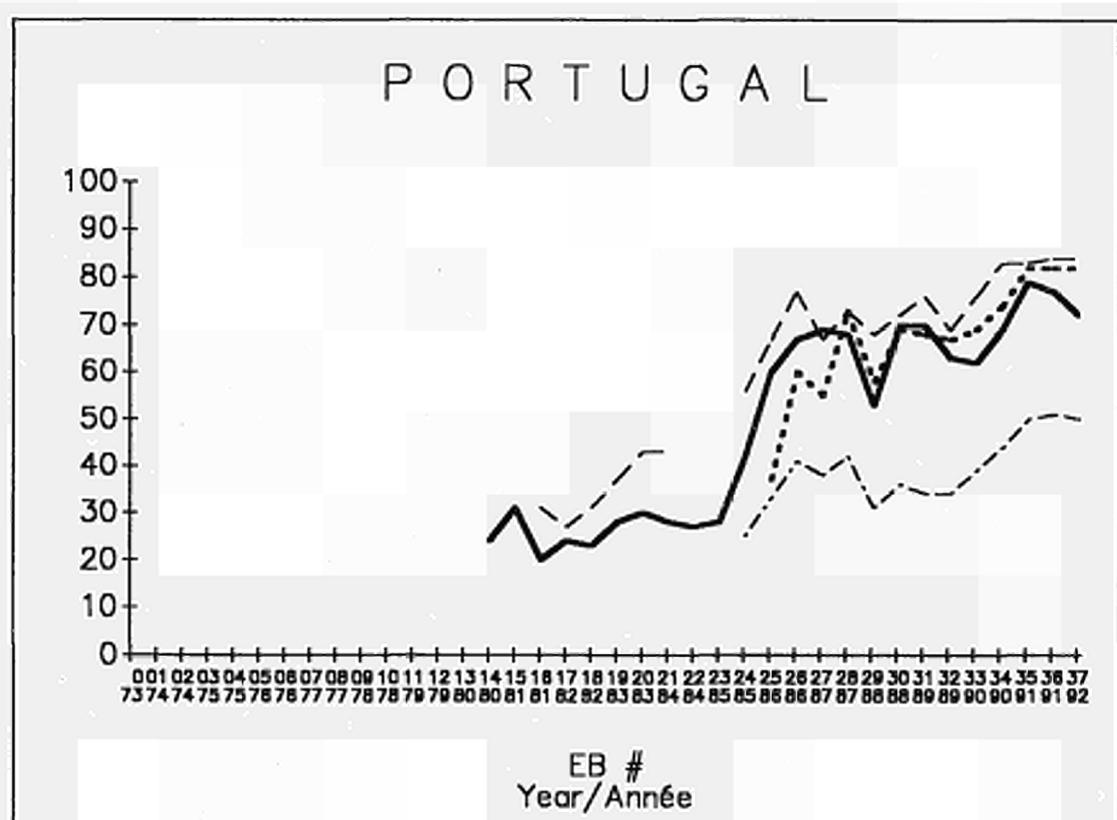

EUROBAROMETER 37

1.2 Public support for the European Community

EUROBAROMETER uses four principal indicators (called "standard indicators") to illustrate long-term trends in public support for the European Community: support for efforts being made to unify Western Europe (tracked since 1962); support for one's country's EC membership (since 1973); an evaluation of the benefits of this membership on one's country (since 1983); and personal feelings experienced if the EC were to be scrapped (since 1971).

Even if, since EB36, Community averages have fallen for each of the four indicators, support for the EC nevertheless remains very high (Tables 1.9, 1.10, 1.11, 1.12 and Figures 1.5. et 1.6.) :

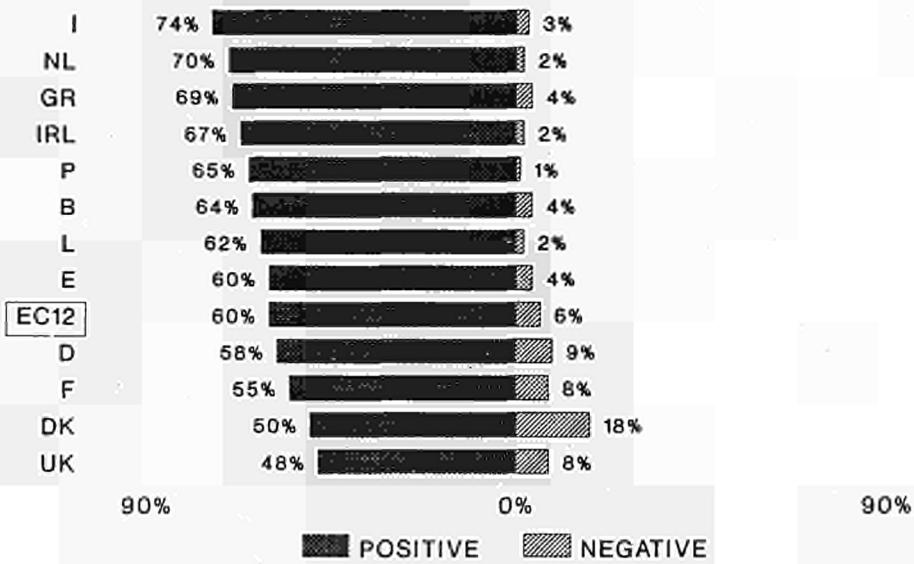

- * 76% of respondents (versus 16%) are for efforts being made to unify Western Europe;
- * 65% think EC membership is "a good thing", 19% "neither good nor bad" and not even 10% "a bad thing";
- * 53% (versus 29%) reckon their country has benefited from its EC membership ;
- * 48% "would be very sorry" if the EC were to be scrapped; 33% would be "indifferent" only 9% "would be very relieved".

Support for Western European unification went up very slightly by one or two points in Greece, Ireland, the United Kingdom, the Netherlands and Portugal; otherwise it fell to a greater or lesser extent everywhere else. As a totality, this support remains always especially high, from 88% of favourable opinions in Italy, to 61% (still a large absolute majority) in Denmark. Danes oppose it the most (35% of unfavourable opinions) while the greatest fall in numbers occurs in Germany (-7 points) (Table 1.9).

The percentage of people thinking that their country's EC membership is "a good thing" has fallen in all member countries, except Greece where the increase is not significant (from 73% to 74%). Above all, falls in Spain (-7 points) and Germany (-6 in West Germany and -7 in East Germany) are noteworthy. Nevertheless, an absolute majority of citizens in all member countries (EC12 average: 65%) think their country's EC membership is "a good thing". The highest figure can be found in the Netherlands (85% versus 4%), and the lowest in the United Kingdom (54% versus 13%) as well as Denmark (57% versus 21%). The number of people believing it is "neither good nor bad" in all countries stayed the same or increased (between 1 and 6 points) (Table 1.10).

EUROBAROMETER 37

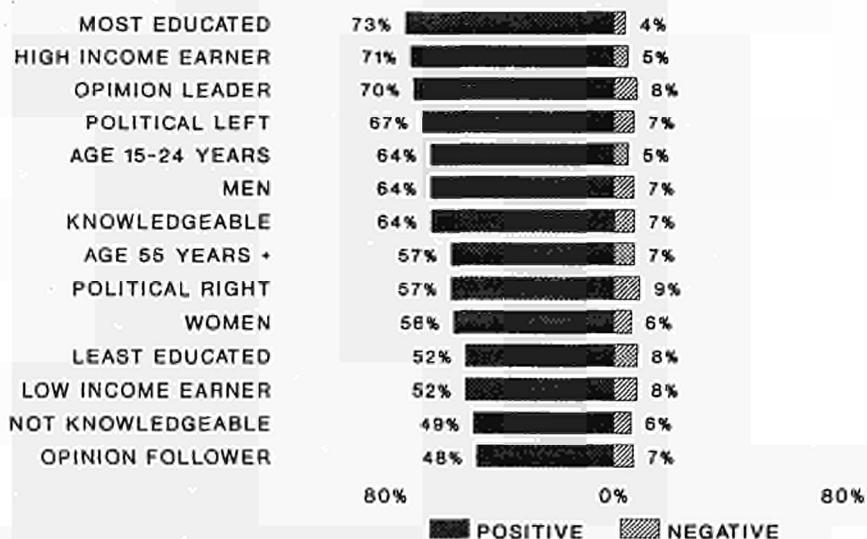

POSITIVE/NEGATIVE ATTITUDES TOWARDS EUROPE - BY COUNTRY (*)

EUROBAROMETER 37 - FIGURE 1.7.

* % EC12 "AMBIVALENT" ATTITUDES: 34%

POSITIVE/NEGATIVE ATTITUDES TOWARDS EUROPE - % EC 12, BY SCIO-DEMOGRAPHIC VARIABLES

EUROBAROMETER 37 - FIGURE 1.8.

In the framework of a special EUROBAROMETER Flash⁶, this question was asked in eight EC countries (except Portugal, Greece, Ireland and Denmark which could not be included), of a total sample of 600 "Euro-Deciders" in April 1992. The result of that Flash shows that 95% of "Euro-Deciders" questioned feel that their country's membership to the EC is "a good thing", 4% think that it is "neither good nor bad" and 1% that it is "a bad thing".

The question about the benefits of EC membership for one's country has evolved similarly to the question above : the results have either dropped (by up to 11 points in Spain), or have remained (practically) unchanged. Here again, positive feelings are dominant in all the member countries : those majorities, either absolute or relative depending on the country, vary from 82% (versus 9%) in Portugal, 81% (versus 12%) in Ireland, to 47% (versus 38%) in West Germany, 45% (versus 37%) in the United Kingdom and 44% (versus 38%) in Spain (Table 1.11).

Asked about the same topic, a very large majority of Euro-Deciders think that their country has gained from EC membership : from 96% in France to 82% in Great Britain; however, in Spain and Great Britain (both 16%), Euro-Deciders are proportionally the greatest in number who think that this membership has not been beneficial.

The evolution of results concerning attitudes towards scrapping the EC can be presented in a slightly different light: the proportion of people who "would be very sorry if the EC was scrapped" slightly fell (between 1 and 5 points; East Germany -7 points) in most countries, except Greece (+5), Luxembourg (+4), Italy (+2) and Spain (+1) (Tableau 1.12).

The percentage of people who "would be very relieved" stayed the same or increased between 1 and 5 points (in West Germany a 7 point increase; in East Germany +4); it only fell in the United Kingdom (-3). The percentage of people who "would be indifferent" increased somewhat in East Germany (+6), Ireland (+5) and France (+4); by contrast it decreased the most in Greece (-4) as well as in Italy and Luxembourg (-3).

Whichever the EC country, people who "would be very relieved" are very much in a minority (EC12 average: 9%); 22% in Denmark, 16% in the United Kingdom and, everywhere else, less than 10%; in West Germany 12%, East Germany 6%. The majority would be "very sorry" (EC12 average: 48%) or "indifferent" (EC12 average: 33%).

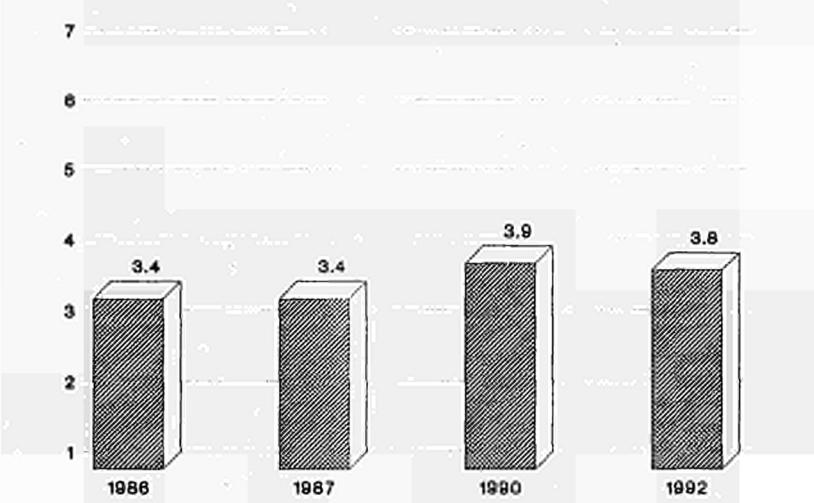

Among "Euro-Deciders", feelings of being "very sorry" are by far the most widespread: from 95% in Benelux to 70% in Great Britain. Once again, Great Britain (19%) has the highest level of people who "would be indifferent".

⁶ The technical specifications regarding this Flash can be found in the Annexes

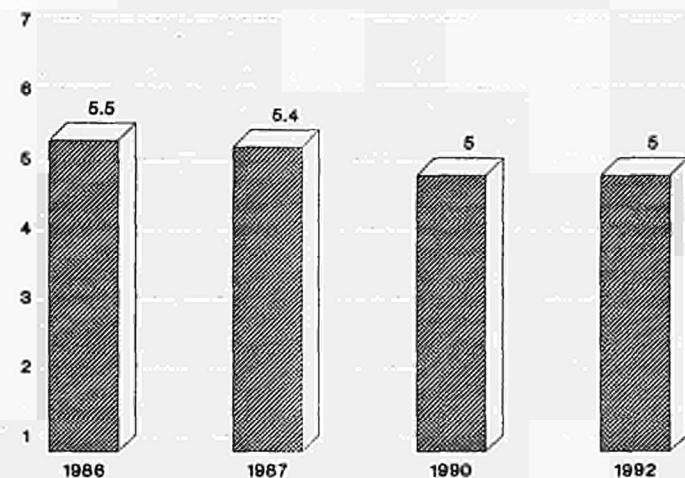

THE "EURO - DYNAMOMETER"
(EC12 AVERAGE ON 7-POINT SCALE - TREND)

EUROPE'S PERCEIVED CURRENT PROGRESS

DESIRED PROGRESS FOR EUROPE

EUROBAROMETER 37 - FIGURE 1.9.

If a "Typology of European Attitudes" is drawn up, based simply on the responses to the question on the unification of Europe and the EC membership of one's country (see Annexes for more details), it shows that the Italians (74% versus 3%) and Dutch (70% versus 2%) have the most positive "European Attitudes"; while the Danes (50% versus 18%) and British (48% versus 8%) less frequently hold such a view. Whatever the country, positive "European attitudes" are clearly dominant (EC12 average: 60%) (Table 1.13, Figure 1.7.).

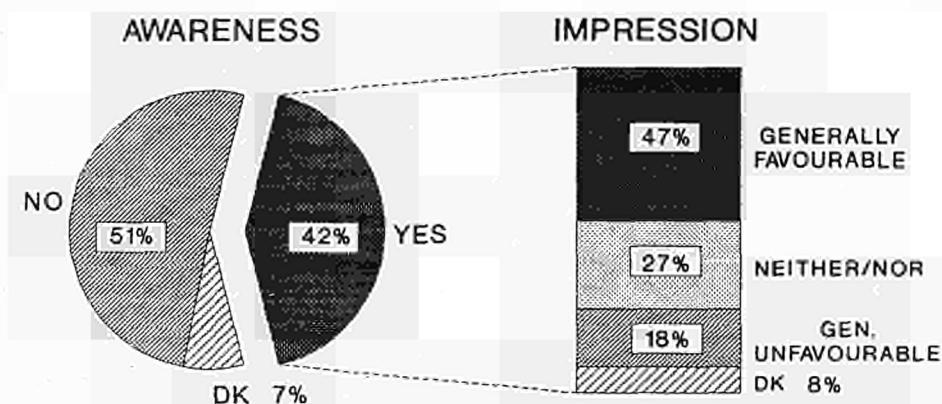

Denmark (18%) is the only country where people are more than 10% negative. This kind of attitude is negligible in Portugal (1%), the Netherlands (2%), Luxembourg (2%), Ireland (2%) and Italy (3%); in West Germany, it is 10% and in East Germany 3%.

As a whole, these figures stayed relatively stable compared to the last survey: at the Community level, positive attitudes (60%) decreased by 3 points, while negatives (6%) as well as those ambivalent (34%) increased by 2 points.

If one examines the way European attitudes vary across several socio-demographic and socio-political variables, it is found that (Table 1.14, Figure 1.8.) :

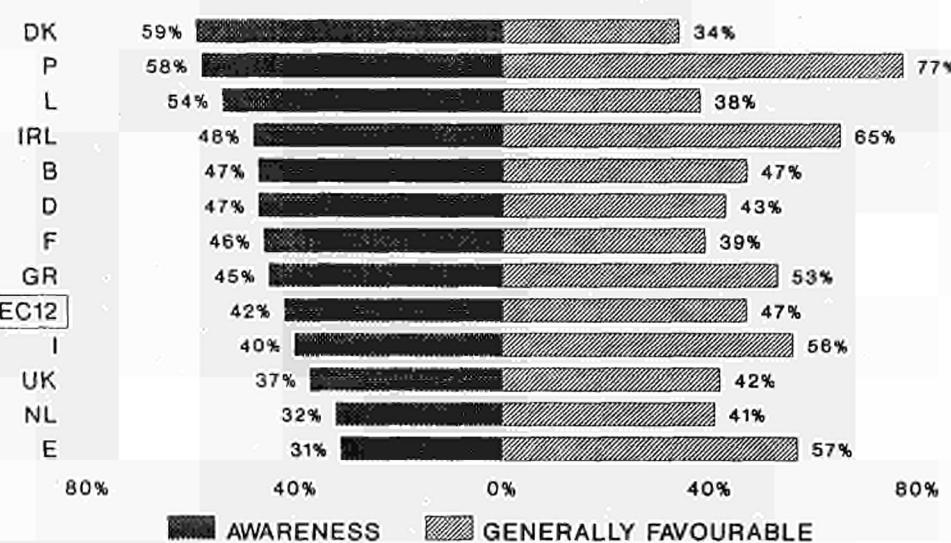

- * women are less inclined to have a positive attitude than men... but this is counterbalanced by a greater percentage of them having ambivalent attitudes;
- * positive attitudes decrease with age, while ambivalence and, in a very irregular and marginal way, negative attitudes both increase;
- * positive attitudes strongly augment with the age of terminating education, directly in contrast to ambivalent and, to a marginal degree, negative attitudes;
- * persons who place themselves on the left of the political spectrum are proportionally more likely to have a positive attitude and less likely to have an ambivalent or negative attitude than those who place themselves on the right;
- * positive attitudes increase with "leadership", while ambivalence drops;
- * positive attitudes augment with income level, while ambivalent attitudes decrease, as do negative views, but in a very irregular and marginal way;
- * the greater the media usage, the more likely a positive, and less likely a negative, attitude;
- * people who have recently heard something about the European Community are more likely to be positive, and less likely to be ambivalent;

- BY COUNTRY

EUROBAROMETER 37 - FIGURE 1.11.

- * positive attitudes are clearly a growing factor in the "Typology of Single Market Attitudes" (the construction of this typology is explained in the Annexes) while the opposite is true of ambivalent and negative attitudes; thus there is a clear direct link between support for Europe/the construction of Europe in general and support for the Single Market.

Concerning the speed of progress of European integration, East Germans are proportionally the most numerous in finding it "slow" (50%); followed by the French (48%) and Dutch (46%). By contrast, Danes are proportionally the most numerous in believing it to be "quick" (50%). Above all, Danes would like to see Europe advance more slowly (40%), while Greeks (78%) as well as Italians (77%) would like quicker progress (Table 1.15, Figure 1.9.).

When the difference is calculated between current (as evaluated by EC citizens) and hoped-for progress (by EC citizens) on Europe, it is always positive (between 0.7 in West Germany and 2.1 in Greece). That is to say, people on average want Europe-building speeded up... with the exception of Denmark where the score is negative (-0.7).

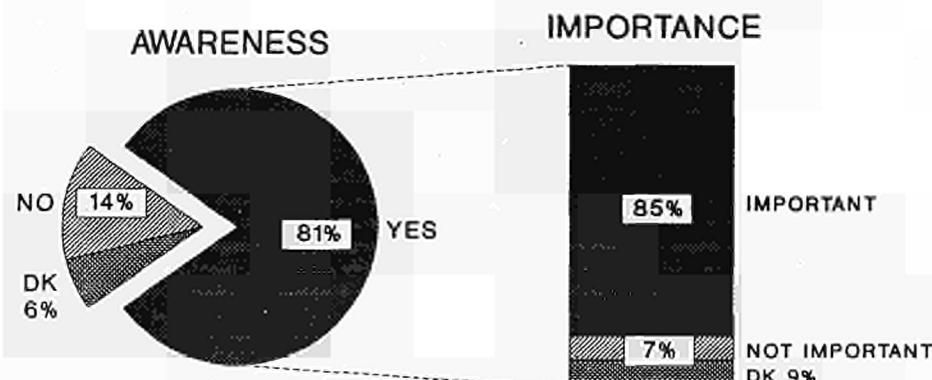

1.3 The image of the Commission

Since the survey of Autumn 1991, the percentage of people having recently heard about the Commission of the European Communities fell by 7 points from 49% to 42%. Awareness of this institution is highest in Denmark (59%), Portugal (58%) and Luxembourg (54%), and lowest in Spain (31%) as well as the Netherlands (32%). The most major positive changes took place in Greece (+7 points) and Portugal (+6); the most negative in the United Kingdom (-16), the Netherlands (-15) and Spain (-12) (Table 1.16, Figure 1.10.).

Among Europeans who had heard recently about the Commission, 47% (certainly a relatively large majority and one point more than in EB 36) received a favourable impression, 27% (+2) a neutral impression and only 18% (-5) an unfavourable impression. It was the most positive in Portugal (77%), where awareness levels were amongst the highest, as well as Ireland (65%); the amount of people with a bad impression of the Commission was greatest in Denmark (33%), the United Kingdom (32%) as well as the Netherlands (30%)(note, however, that the percentage of people having a bad impression has fallen considerably in the United Kingdom (-10) and the Netherlands (-6) (Table 1.17, Figure 1.11).

AWARENESS AND IMPORTANCE OF THE
PORTUGUESE PRESIDENCY - EC 12

EUROBAROMETER 37 - FIGURE 1.12.

AWARENESS AND IMPORTANCE OF EC
PRESIDENCY

EUROBAROMETER 37 - FIGURE 1.13.

1.4 The Portuguese Presidency

A very large majority (81%) of Portuguese respondents say they have "read in the newspapers or heard on the radio or television "something about the Presidency of the Council of Ministers assumed by their country during the first half of 1992. This level of awareness is the same as that of the Netherlands Presidency (second half of 1991) and almost as high (82%, or the "highest of the high") as that of the Luxembourg Presidency (first half of 1991) (Table 1.18, Figure 1.12).

85% of Portuguese interviewed believe their Presidency "important" or "very important"; only 7% think otherwise. This figure is by far the highest ever registered since the question was first asked at the time of the British Presidency in 1986. The only result which approaches this figure a little is at the time of the Spanish Presidency (78%) during the first half of 1989 (Table 1.18, Figure 1.13.).

1.5 The European flag

Once shown the European flag, and without saying what the symbol represents, 80% of EC citizens confirm that they have seen it before. Despite big variations from country to country - 67% in the United Kingdom, 73% in West Germany ... up to 96% in Luxembourg and 98% in Denmark - this percentage is very high in all member countries (Table 1.19, Figure 1.14.).

To assess the "visibility" of the European flag, EC citizens **who had seen this flag** were asked where they had seen it (many answers were permitted). As shown in Table 1.20 and Figure 1.14., television was most often recalled in all EC countries (EC12 average: 76%): from 66% (United Kingdom) and 68% (Ireland and the Netherlands) up to 95% (Portugal).

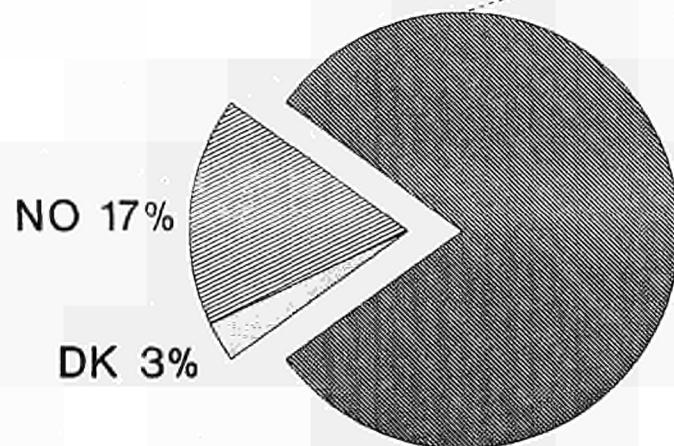

In second place - depending on which country - one finds posters (5% in the United Kingdom, 20% in Spain up to 59% in East Germany, 67% in Luxembourg; EC12 average: 34%), newspapers (11% in the United Kingdom, 23% in the Netherlands, 25% in Ireland to 52% in Denmark and 54% in Luxembourg; EC12 average: 31%); in Spain, second place is occupied equally by newspapers and public buildings. Magazines (EC12 average: 28%) are cited very frequently in Belgium (45%), Portugal (43%) and Luxembourg (42%).

An open ended question was asked, as before, only of those people who had already seen the European flag: "what does this symbol stand for?" Analysis of the responses to this question reveal that 86% of people interviewed reply correctly, i.e. associate this flag with Europe; 9% reply incorrectly and 9% do not give an opinion (Table 1.21).

VISIBILITY OF EUROPEAN FLAG - EC 12

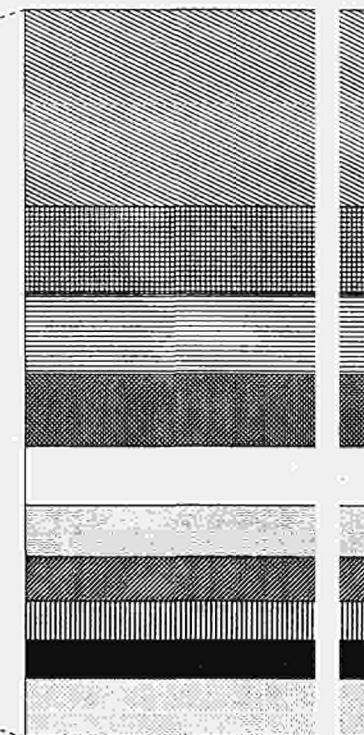

ALREADY SEEN EC SYMBOL?

WHERE?

(% , SEVERAL ANSWERS POSSIBLE)

EUROBAROMETER 37 - FIGURE 1.14.

The 86% that respond correctly can be divided into two relatively homogenous groups:

- * replies making explicit reference to a flag or European/EC symbol (41%),
- * replies not making explicit reference to a flag or European/EC symbol (45%), but linking the flag to Europe, European Union or to EC activities.

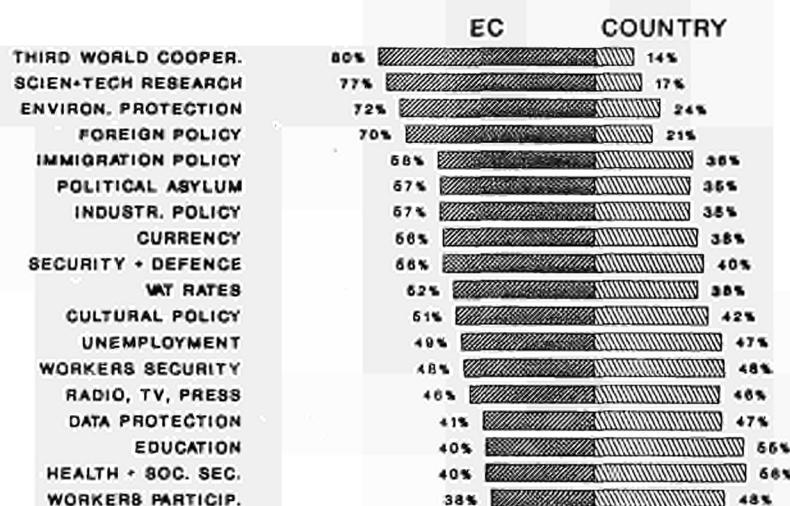

Finally the whole sample, and not just people who had already seen the European flag, were asked to give their views on five statements concerning this flag. To define better their opinion, respondents were able to chose a number for each of these statements, the two extreme numbers being "1" (which signifies complete agreement with the opinion on the left of the scale) and "10" (which signifies complete agreement with the opinion on the right of the scale).⁷ Table 1.22, which shows the average results by country for each statement, indicates that:

- * for the statement "I don't like this flag (=1 point)/I like this flag (=10 points)" the Community average is 7.2. Depending on the country, this average varies from 5.9 in the Netherlands, 6.2 in Denmark and Luxembourg, up to 8.0 in Italy;
- * for the statement "this flag stands for something which is not good (=1 point)/this flag stands for something good (=10 points)", the Community average is 7.0 points. Depending on the country, this average varies from 5.6 in Denmark and 6.2 in the United Kingdom, up to 7.7 in Italy;
- * for the statement "this flag should not be seen on all public buildings in (our country) next to the national flag (=1 point)/this flag should be seen on all public buildings in (our country) next to the national flag (=10 points)", the Community average is 6.5 points. Depending on the country, this average varies from 3.7 in Denmark, 5.2 in the United Kingdom, up to 7.7 in Italy;
- * for the statement "I am not proud of this flag (=1 point)/I am proud of this flag (=10 points)", the Community average is 5.6 points. Depending on the country, this average varies from 4.1 in Denmark, 4.3 in the United Kingdom, up to 6.8 in Italy;
- * for the statement "I don't consider this flag to be mine (=1 point)/I consider this flag to be mine (=10 points)", the Community average is 5.2. Depending on the country, the average varies from 3.2 in Denmark, and 3.6 in the United Kingdom, up to 6.4 in Italy.

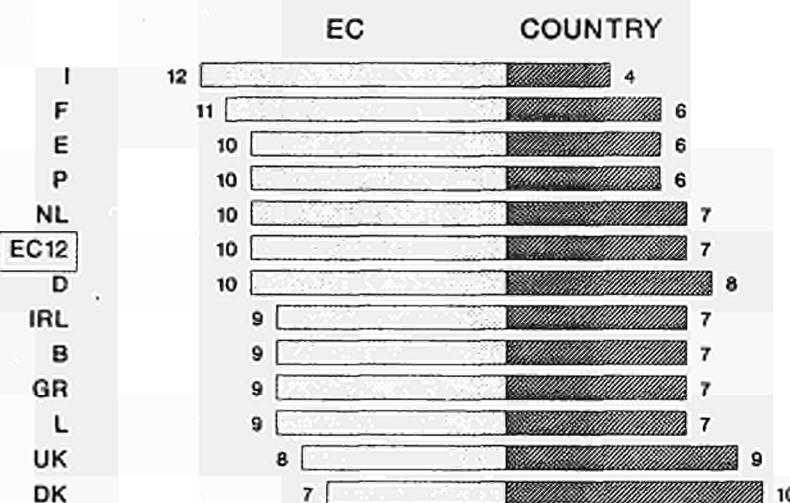

⁷The number 5.5 is therefore the most neutral number. The lower you go, the closer the opinion is to the left of the scale and hence the more negative an opinion is expressed; by contrast, the higher you go, the closer the opinion is to the right of the scale and the more positive an opinion is expressed.

EUROBAROMETER 37

BEST DECISION-TAKING LEVEL FOR 18 POLICY AREAS - EC 12

AVERAGE NUMBER OF POLICY AREAS CITED AT THE EC AND COUNTRY LEVEL (OUT OF 18) - BY COUNTRY

EUROBAROMETER 37 FIGURES 2.1.1. AND 2.1.2.

2. EUROPEAN POLITICS

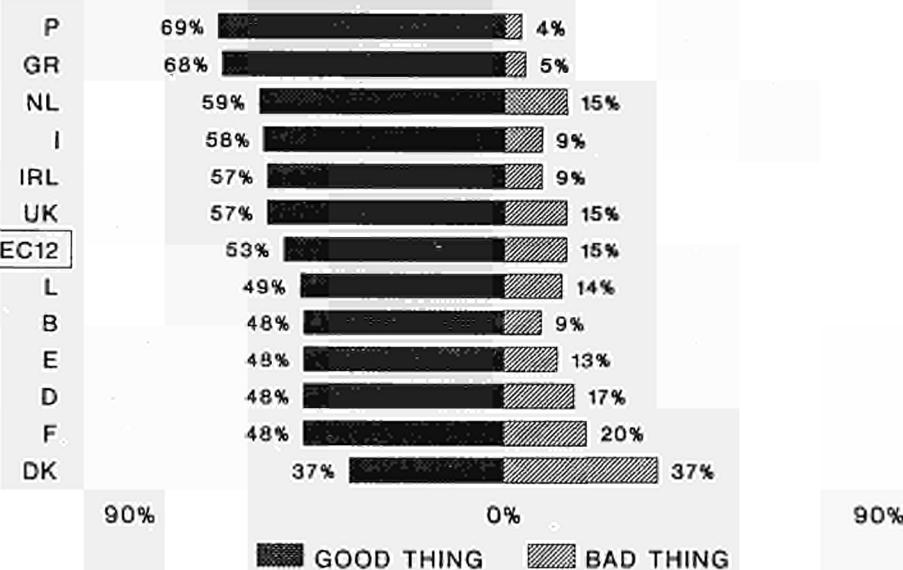

2.1 EC and national policy domains

When asked, at least seven out of ten EC citizens cite "cooperation with developing countries, the Third World" (EC12 average: 80%; absolute majorities of at least 66% in all countries), "scientific and technological research" (77%; absolute majorities of at least 70% in all countries), "protection of the environment" (72%; absolute majorities of at least 60% in all countries) and "foreign policy towards countries outside the EC" (70%; absolute majorities of at least 53% in all countries) as policy-making areas which should be decided "jointly within the European Community" rather than at the national government level (Table 2.1, Figure 2.1.1.).

By contrast, an absolute majority of them prefers that "health and social welfare" (56%) as well as "education" (55%) stay under the aegis of the national government; and a relative majority believes that national decisions should also predominate in the "participation of workers' representatives on company boards of directors" and in "the protection of computer-based information on individuals".

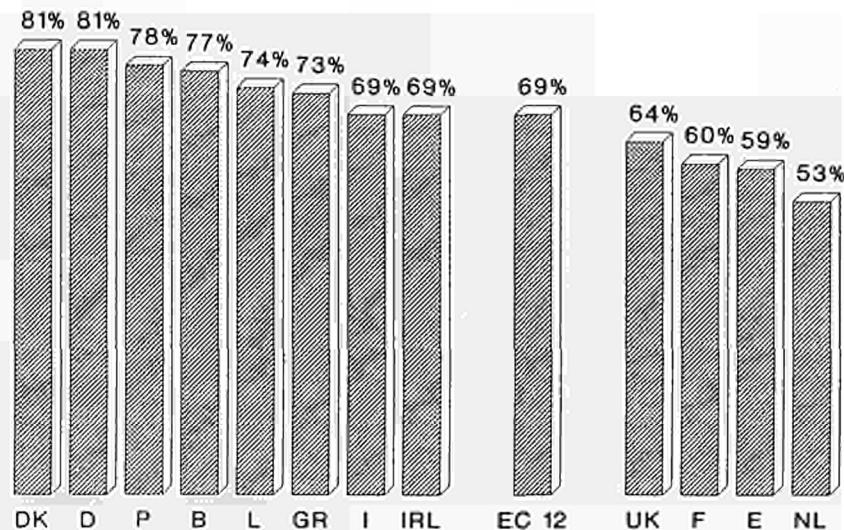

EUROBAROMETER 37

PROPOSED CAP REFORMS: GOOD OR BAD THING? - BY COUNTRY

EUROBAROMETER 37 - FIGURE 2.2.

AWARENESS OF "1992" IN THE MEDIA -BY COUNTRY

EUROBAROMETER 37 - FIGURE 2.3.

More detailed analysis of these results shows that, in decreasing order, the Danes, British, French, East Germans, Luxemburgers and Belgians primarily want (by absolute majorities of 60% to 84%) the policy area of "health and social welfare" to stay in national government hands; and, as always in decreasing order, the British, Danes, East Germans, Irish, Dutch and Belgians want the same for "education" (absolute majorities: 60%-73%).

If, for each country, one calculates the average number of policy areas which people say should become a Community responsibility (EC12 average: 10 out of 18) as opposed to a national responsibility (EC12 average: 7 out of 18), the Italians (12) and French (11) delegate the most policy areas to the EC while the British (8) and Danes (7) delegate the least to it (the United Kingdom and Denmark are the only two countries where national competencies are more likely to be cited than EC competencies (Figure 2.1.2.).

Within the framework of the "Flash" EUROBAROMETER survey organised in eight EC countries (see Chapter 1 and Annexes), "Euro-Deciders" were also asked that question. They believe above all that "cultural policy" (80%) and "education" (76%) should stay a national government responsibility, while "protection of the environment" (85%), "cooperation with developing countries" (79%), "rates of VAT" (77%) and "foreign policy towards countries outside the EC" (76%) should be dealt with at the Community level.

EUROBAROMETER 37

The Portuguese and Greeks are proportionally the most numerous in considering the plan "a good thing" (69% and 68% respectively for these two countries) while Danes ("bad thing": 37%) and the French (20%) are most frequent in espousing the other view.

In six months, these results have changed considerably in Denmark, Greece, Spain and Luxembourg:

- * the percentage of Spaniards (-9), Danes (-7), Luxemburgers (-6) and French (-4) thinking it "a good thing" has fallen substantially, while the proportion of those who think the contrary has increased (from 4 to 5 points depending on the country);
- * the percentage of Greeks who think the plan is "a good thing" has increased (+7), while the proportion of those who do not express themselves or who think it is "neither good nor bad" had fallen by 9 points.

This question has also been asked among "Euro-Deciders" in the framework of the Flash survey (see above). It shows that 76% of them think this reform constitutes "a good thing" (from 62% in Germany to 83% in the Benelux) and 20% (from 13% in Spain to 37% in Germany) "a bad thing".

2.3 The Single Market and its social dimension

69% of EC citizens (from 53% of the Dutch to 81% of Danes and Germans, that is to say, an absolute majority in all member countries) have heard of the "Single European Market of 1992". The Dutch (45%), Spaniards (36%), French (35%) and British (34%) are proportionally the most numerous in not having heard about it (Table 2.3.1, Figure 2.3.).

Among the 66% of Europeans who have heard about the EC (see Table 1.1), 81% have also heard about the Single Market; 16% have not heard anything about the subject while 3% do not comment. Among those (32%) who have not heard about the EC, these figures are respectively 45%, 50% and 5%. A consequence of this is that an overwhelming majority of people interviewed (81% !) have heard about either the EC, or the Single Market, or moreover both of them (Table 2.3.2).

By comparison with the last survey, important changes have taken place: except for Portugal (+4) and East Germany (+1), the percentage of people having heard anything about the Single Market had decreased throughout the EC: from 2 points in Belgium to 14 points in the Netherlands; the Community average has fallen by 7 points.

For 55% (versus 28%) of EC citizens, the Single European Market evokes "hope" rather than "fear". In all member countries, there is a relative majority of "hope": from 44% (versus 40%) in Luxembourg to 67% (versus 22%) in Italy (Table 2.4, Figure 2.4.).

Above all, the Italians (67% "hope" versus 22% "fear"), Irish (65% /16%), Dutch (65%/18%) and Portuguese (64%/17%) feel "hope", while Luxemburgers (40% "fear" versus 44% "hope"), French (40%/52%) and Danes (38%/56%) feel "fear" more than anyone else.

Compared to six months ago, hope has strongly diminished :

- * in Germany : -9 points, balanced by a slight increase in fear (+3) and a strong advance in "DK/NR" (+6) ;
- * in Spain : -8 points, balanced by a slight increase in fear (+3) and a strong advance in "DK/NR" (+7) ; and
- * in Ireland : -7 points, balanced by a strong advance in "DK/NR" (+7) and accompanied by a (not significant) decrease in fear (-1).

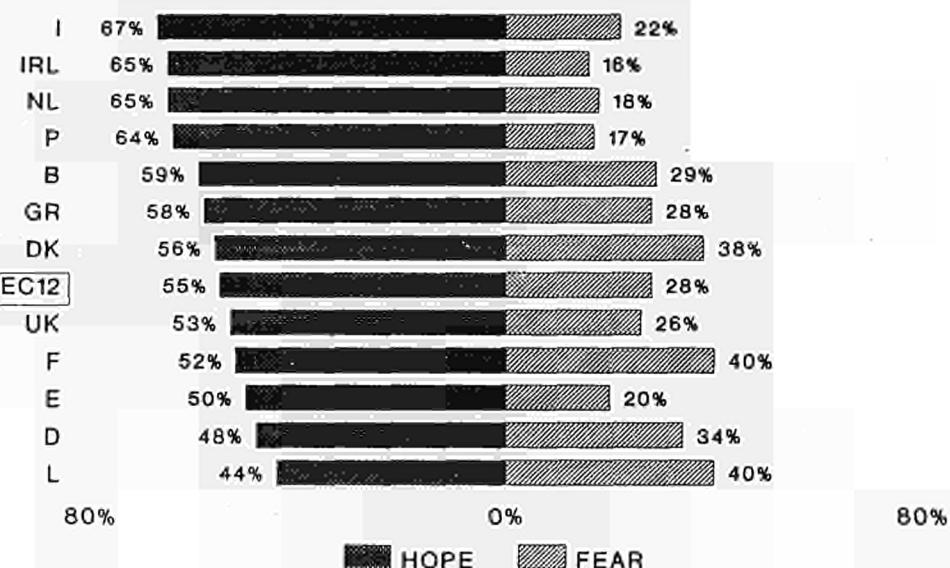

44% of Europeans (from 34% in France to 63% in Italy) believe that the Single Market is "a good thing". The proportion of people who think otherwise is very small: the highest percentages are registered in Denmark (17% versus 40% "a good thing"), West Germany (14% versus 36%), Belgium (12% versus 42%), the United Kingdom (12% versus 40%) and France (12% versus 34%). The percentage of people who think that the Single Market is "neither good nor bad" is especially high : at the Community level, it rises to 31%; in France, it even reaches 44%, and 42% in Luxembourg (Table 2.5).

Since the last survey, "good thing" responses have fallen 4 points at the Community level, "bad thing" and "neither good nor bad thing" held steady (respectively +1 and -1); "DK/NR" have increased 3 points. The most significant national changes are as follows:

- * "good thing" responses increased 6 points in Portugal and 4 points in Greece; they fell 6 or 7 points in Germany, Spain and Italy.
- * "neither good nor bad thing" responses have fallen 6 to 7 points in Belgium, Greece, Spain and Portugal; they have increased by 7 points in Italy and 4 points in East Germany.
- * "bad thing" responses have fallen 4 or 5 points in Ireland and Luxembourg; they have increased by 4 points in Belgium and Spain.

* % EC12 "AMBIVALENT" ATTITUDES: 53%

POSITIVE/NEGATIVE ATTITUDES REGARDING
"1992" - % EC 12, BY SOCIO-DEMOGRAPHIC
VARIABLES

EUROBAROMETER 37 - FIGURE 2.7.

EUROBAROMETER 37

The "Typology of Single Market Attitudes" (refer to the Annexes for their structuring) reveals that "positive attitudes" characterise 38% of Europeans, "ambivalent" 53% and "negatives" not even 8%. Six months ago, the numbers were 42%, 51% and 7% respectively (Table 2.6, Figure 2.6.).

Above all, the Italians (54%), Portuguese (52%) and Irish (50%) display positive attitudes, while Danes (16%) are the most often negative; the Luxemburgers (68%) and French (60%) most frequently show an ambivalent attitude.

Compared to six months ago, some countries show significant changes:

- * ambivalent attitudes have fallen in Belgium (-6), Portugal (-4) and Greece (-3), while positive attitudes have increased by 3, 5 and 4 points respectively ;
- * positive attitudes fell in Italy (-9), Germany (-6) and Spain (-5), whereas ambivalent (+9, +6 and +2 respectively) and negative (unchanged, +1 and +4 (the latter being the highest registered)) increased or stayed the same.

When one cross-analyses these results with various socio-demographic and socio-political variables, the tendencies which have already been described in Chapter 1 (Section 1.2) for the "Typology of European Attitudes" hold true here as well (Table 2.7, Figure 2.7):

- * women are proportionally less numerous than men in displaying positive attitudes, but this is counter-balanced by proportionally more ambivalent attitudes;
- * positive attitudes tend to decrease with age, contrary to ambivalent attitudes and - to a lesser and non-continuous degree - negative attitudes;
- * positive attitudes increase strongly with termination age of studies, contrary to ambivalent attitudes and - in a relatively marginal and non-continuous manner - negative attitudes;
- * positive attitudes are proportionally more numerous - and negative, less numerous - on the left as compared to the right of the political spectrum;
- * positive attitudes increase with "leadership", while ambivalent attitudes decrease;
- * positive attitudes increase with income level, contrary to ambivalent attitudes and - in a relatively marginal way - negative attitudes;

- * the greater the media usage, the more proportionally numerous people are in having positive attitudes and the less likely they are in having ambivalent or negative attitudes;
- * positive attitudes are more frequent among people who have recently heard about the European Community, contrary to ambivalent attitudes;
- * as opposed to ambivalent and negative attitudes, positive attitudes are a largely increasing factor in the "Typology of European Attitudes" (the construction of this Typology is explained in the Annexes).

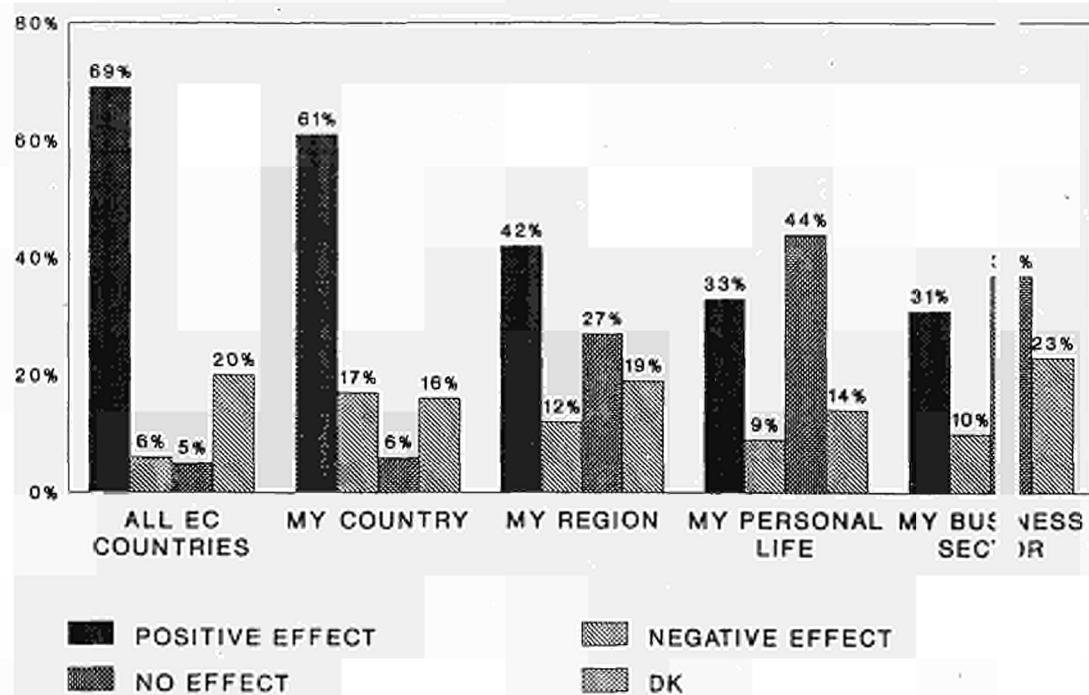

An absolute majority of people in all Community countries think that the social dimension of the Single Market is "a good thing": the EC12 average is 67% with national percentages varying from 52% in Denmark to 81% in Portugal. Denmark and Belgium respectively register the strongest rate of "bad thing" (29%; EC12 average: 8%) and "neither good nor bad" (26%; EC12 average: 12%) responses (Table 2.8, Figure 2.5.).

Even if Community averages have not altered much since EB36 (from -1 point to +2 points depending on response categories), some national percentages have, nevertheless, undergone major changes:

- * The percentage of people thinking that this "European Social Dimension" is "a good thing" has substantially increased in Luxembourg (+8), Portugal (+7), France (+7) and Greece (+5). These rises have been accompanied by a decrease in DK/NR and/or "bad thing" and/or "neither good nor bad" responses; in France, "bad thing" responses have gone up as well (+2).
- * Only Denmark registers a significant - if light - fall in "good thing" responses (-3); and the strongest increase (+6) in "bad thing" responses. In Germany, the latter response went up 3 points (a rise exclusively balanced by an equivalent fall in DK/NR), the second most important increase.

The same tendencies can be seen comparing the results of the question "the Single Market - a good thing?" and those of the question "Social Dimension of the Single Market - a good thing?". In both cases: a) the Italians, Portuguese and Greeks are proportionally the most numerous in thinking that it is "a good thing"; and b) Danes are proportionally the most numerous in finding it "a bad thing".

POSITIVE AND NEGATIVE EFFECTS OF "1992"
- EC 12

EUROBAROMETER 37 - FIGURE 2.8.

When Europeans are asked if they think the effects of the Single Market will be positive or negative for "their personal life", "the type of business they work in", "the region where they live", "their country" or even "the countries of the EC", the Portuguese are always at the head of the countries which think the effect will be positive (Table 2.9.1, Figure 2.8.).

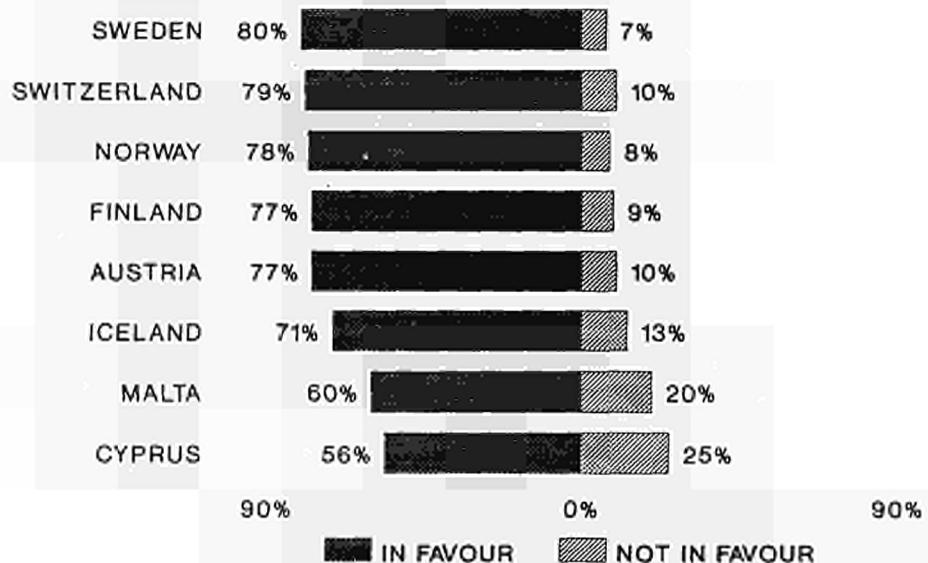

At the Community level, the nearer one moves towards the sphere of the individual - that which has a direct impact on the citizen - the more the positive effects reduce and "no effect" responses above all benefit. Thus the percentage of "positive effect for the countries of the EC" is the highest (EC12 average: 69% "positive effect" versus 5% "no effect"), followed by "our country" (61%/6%) and "our region" (42%/27%) ; for "the type of business in which I work" (31%/37%) and "my personal life" (33%/44%), the "positive effect" does not differ much, but "no effect" follows the same pattern.

The results for each item is shown as follows :

- * in all EC countries, an absolute majority of people interviewed think that the Single Market will have a positive effect for "the countries of the EC" (from 61% of Luxemburgers to 76% of Portuguese);
- * in all EC countries, an absolute or relative majority of people interviewed think that the effect of the Single Market will be positive for "their country" (from 44% of West Germans to 76% of Portuguese);
- * A majority of citizens assess that the Single Market will have no effect for "the region where they live" in Luxembourg (51%), in Belgium (46%), the Netherlands (43%), the United Kingdom (39%) and West Germany (36%). Everywhere else, a majority thinks it will have a positive effect (from 30% in Denmark to 67% in Portugal);
- * A relative majority of citizens think that the effects of the Single Market will be positive for "the type of business they work in" in Portugal (48%), Greece (42%), Spain (33%) and Denmark (32%). Most (36%) do not comment in the Netherlands and a majority (from 38% to 47%) thinks there will be no effect in other countries (except France where views are divided: 34% "positive effect" and "no effect").
- * Most people in Portugal (52%) and Greece (45%) believe that the effect of the Single Market will be positive for "their personal life"; elsewhere a majority (from 37% in Spain to 55% in Belgium) thinks there will be "no effect".

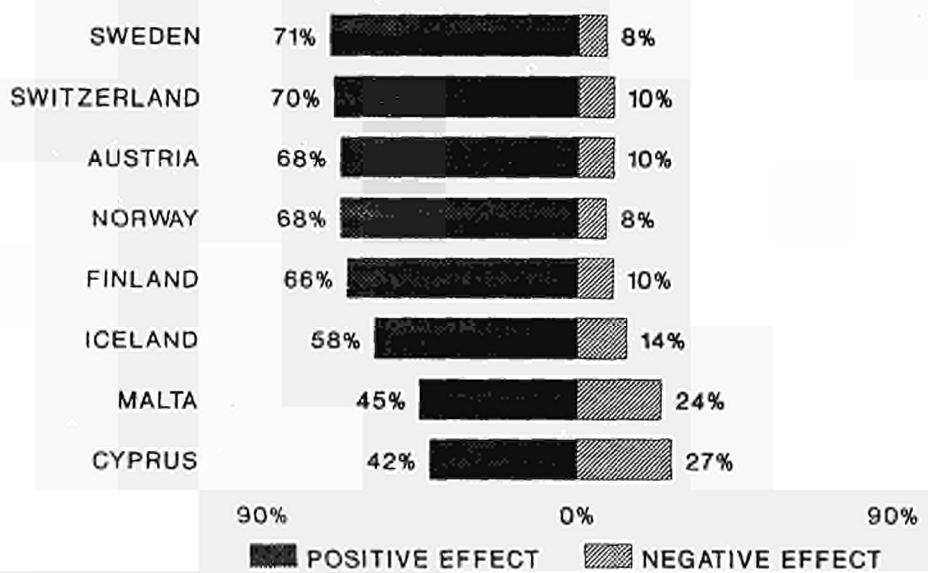

EUROBAROMETER 37

FAVOURABLE OR NOT CONCERNING NEW EC
MEMBERS ? - EC 12

EUROBAROMETER 37 - FIGURE 2.9.

IMPACT OF POTENTIAL NEW EC MEMBERS ?
- EC 12

EUROBAROMETER 37 - FIGURE 2.10.

This question has also been asked in the framework of the "Flash" survey organised among "Euro-Deciders" (see above). The same logic applies as had been shown above, but in a distinctly diminished way. This "diminishing" can firstly be explained by the fact that, irrespective of which country (or group of countries concerning Benelux), the percentage of "positive effects" everywhere attains an absolute majority, except in Benelux on the issue of "the region where I live", where this threshold is none the less almost attained (49%) (Table 2.9.2).

It is interesting to note that "Euro-Deciders" in the United Kingdom (68% and 64% respectively) and Germany (66% and 63%) are proportionally the most numerous in considering that the effect of the Single Market will be positive for their type of business and for their personal life, while Spanish (78%) and Italian (76%) Euro-Deciders are ahead concerning the positive impact on the region where they live.

2.4 EC enlargement

After Turkey (1988), Austria (1989), Cyprus (1990), Malta (1990) and Sweden (1991), Finland and Switzerland this year joined the list of countries having submitted their applications to join the European Community. Faced with these candidatures, one of the EC's preoccupations is particularly the question of whether it would not better (first of all) to "deepen" the Community rather than enlarge it to around twenty countries, which might be joined in due course by Central and Eastern European countries. Are citizens from current EC countries in favour or not of these new members? If yes, which candidatures do they support?

In all EC countries, an absolute majority of citizens are in favour of EC membership for Sweden (EC12 average: 80% "for"), Switzerland (79%), Norway (78%), Finland (77%), Austria (77%) as well as Iceland (71%). Concerning Malta (EC12 average: 60%), only West Germany shows a relative rather than absolute majority in favour (46%). As to Cyprus (EC12 average: 56%), favourable opinions do not attain absolute majorities in all member countries, but nevertheless systematically achieve a relative majority (Table 2.10, Figure 2.9.).

Danes and East Germans are always proportionally the most numerous in favouring membership for Austria, Sweden, Finland, Norway, Iceland and Switzerland; while Italians and the British are the most in favour of Malta; and the Greeks and Italians of Cyprus. France has the highest percentage of people not in favour of Austria, Sweden, Finland, Norway, Iceland and Switzerland joining; for Malta, those least in favour are West Germany, France and Luxembourg; and for Cyprus, it is West Germany, Denmark, Luxembourg and France.

EUROBAROMETER 37

If Europeans are asked if each of these countries joining would have a positive or negative effect on the current twelve EC member countries and their citizens, an absolute majority in all EC countries thinks that it would be positive in the cases of Austria, Sweden, Finland, Norway, Iceland and Switzerland. For Malta, national percentages of "positive effect" attain a relative majority everywhere except West Germany; while for Cyprus, these national percentages attain relative majorities everywhere as well, except in Denmark, West Germany and the Netherlands. At the EC12 level, the percentages of "positive effects" increase to 71% for Sweden, 70% for Switzerland, 68% for Austria and Norway, 66% for Finland, 45% for Malta and 42% for Cyprus (Table 2.11, Figure 2.10.).

3. POLITICAL, ECONOMIC AND MONETARY UNION

3.1. Economic and Monetary Union

Economic and Monetary Union (EMU) is, along with Political Union, the chief component of the Maastricht Treaty. The procedure worked out to reach EMU as such had already begun on 01/07/1990 and envisaged three successive stages, the last of which is due to start no earlier than 01/01/1997, or 01/01/1999 at the latest. Once achieved, the EC is envisaged to have a "European system of central banks" (composed of the European Central Bank and national central banks), a single currency (the ECU: this treaty foresees that only the United Kingdom will be allowed to decide by itself whether to opt in or out of this single currency), a single monetary policy and an external exchange rate policy for the ECU.

In order to grasp the level of support that EC citizens bring to EMU, the EUROBAROMETER asked a question about the creation of a European Central Bank and another about replacing the different currencies of the member states with a single common currency. At the Community level, an absolute majority of people interviewed are in favour of realising these two projects (Table 3.1).

The idea of creating a European Central Bank is backed by 55% of EC citizens (versus 25%). The Dutch (68%), Portuguese (65%) and Luxemburgers (64%) are proportionally the most numerous in favouring it.

EUROBAROMETER 37

The United Kingdom (37% "in favour" versus 44% "not in favour") and Denmark (42% versus 51%) are the only two countries where the percentage of people not in favour of a European Central Bank is higher than those who are in favour. Everywhere else except West Germany (47% "in favour" versus 33% "not in favour" - a relative majority of those "in favour"), absolute majorities declare themselves in favour of this Bank.

Most citizens also agree with the idea of establishing a single European currency (54% "in favour"/31% "not in favour"). Italians (73%), Belgians and Greeks (both 68%) declare themselves most frequently in favour of such a currency. Only most Danes (37% "in favour"/57% "not in favour"), British (35%/52%) and West Germans (39%/46%) are not in favour. Everywhere else, an absolute majority is in favour except in East Germany (47%/41% - a relative majority "in favour").

3.2 Political Union - foreign policy, security and defence

The existence of a European foreign, security and defence policy is a fundamental condition of Political Union, which the details of the Treaty of Maastricht foresee happening in different stages. The "Common Foreign and Security Policy" (CFSP) section implies that Ministers of Foreign Affairs from different member states would cooperate more closely than even under the "Political Cooperation" arrangement which has been in place since 1970/1974; its chief objectives are to: safeguard common values, fundamental interests and the independence of the Union, reinforce the security of the Union and its member states, maintain peace and reinforce international security, promote international cooperation...

As to the section on "European defence policy", the Treaty only hints at it, indicating mainly that a defence dimension should be integrated into the CFSP. This dimension could, in the end, lead to a real "common defence". The Western European Union ("WEU", which is only composed of nine countries for now, even if the Twelve already foresee negotiations leading towards Denmark, Ireland and Greece joining) will begin to play an essential role in the development of this common defence and will be integrated progressively into the Political Union, finally completely merging into it in 1998.

As in EUROBAROMETER 34-36, this survey measured EC citizens' support for the questions of foreign policy, security and defence which have been finalised in the Maastricht Treaty. Results relating to this question are presented as follows (Table 3.2):

- * 59% versus 23% are in favour of, "as a Political Union, the EC being responsible for foreign policy towards countries outside the EC". A relative majority of favourable opinions are found in Ireland (49% "in favour"/ 24% "not in favour"), Denmark (48% / 43%) and the United Kingdom (44% / 38%), even if unfavourable opinions are very large in the two latter countries; in all other member states, this majority is absolute (from 56% in Spain to 73% in Italy). With the exception of Greece (-3 points), percentages "in favour" have increased since the last survey (see EB36) in all member countries: from 2 points (Belgium, Spain) to 10 points (Portugal) or even 11 points (Luxembourg); the rise in Denmark is 8 points and, at the Community level, 4 points.
- * 70% versus 16% are in favour of, "as a Political Union, the EC being responsible for a common policy in matters of security and defence". Except for Ireland, (47% "in favour"/ 29% "not in favour" - a very comfortable relative majority "in favour"), absolute majorities in favour emerge everywhere: from 52% (versus 40%, the strongest opposition) in Denmark, 55% (versus 31%) in the United Kingdom ...up to 82% (versus 10%) in the Netherlands and 83% (versus 9%) in East Germany (West Germany: 71% versus 14%). Except in Greece and Ireland (results as before), the percentages of those "in favour" have risen everywhere since the last survey: from 2 points (Belgium, Spain) to 7 points (West Germany, France, Luxembourg) and even 8 points (East Germany); in Denmark and the United Kingdom, as well as at the Community level, the rise is 5 points.

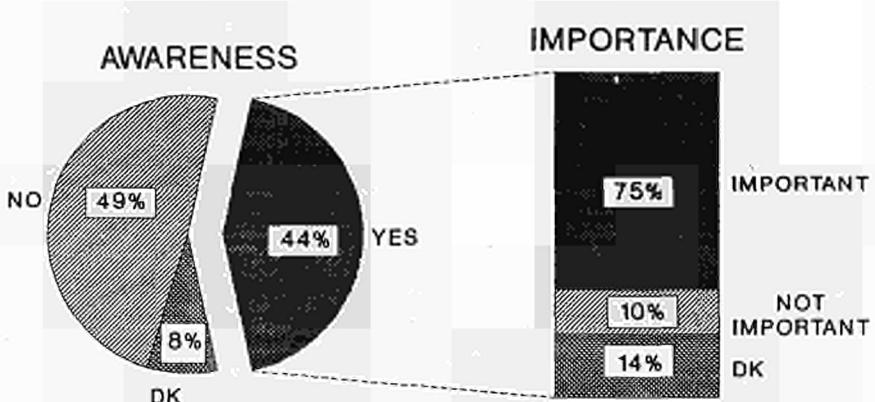

3.3 Treaty of Maastricht

The "Treaty on European Union" was approved by the Heads of State or Government of the twelve member states during the European Council ("summit") of Maastricht on 11 December 1991. It was signed in the same town on 7 January 1992.

Despite the importance of this event for the future of Europe, only 44% (versus 49%) of EC citizens in March/April 1992 said they recently heard anything about this summit. Depending on the country, this percentage oscillates between 30% (Italy) and 74% (the Netherlands). People saying they have not heard about "Maastricht" constitute an absolute majority in Spain (63%), Italy (62%), Portugal and Germany (both 51%) (Table 3.3, Figure 3.1.).

EUROBAROMETER 37 - FIGURE 3.1.

POSITIVE AND NEGATIVE IMPACT OF THE
MAASTRICHT TREATY - EC 12 (% OF THOSE
AWARE OF TREATY)

EUROBAROMETER 37 - FIGURE 3.2.

People who have heard about the Summit in ten out of twelve member states remember "Monetary Union" by far the most frequently (EC12 average: 32%) among the themes of the summit and of the Treaty of Maastricht (this was an open-ended question); in Greece, "defence policy" (11%) is as frequently cited as "Monetary Union" (10%), while the latter issue is hardly mentioned in Portugal even if "Political Union" is cited by 50% of people interviewed. The percentage of people who did not give an opinion on this question is especially high: although it does not rise above 3% in the United Kingdom, it reaches 51% in France and 59% in Spain; the EC12 average is 36% (Table 3.4).

"Monetary Union" is most frequently mentioned in Germany (45%), Luxembourg (41%), Belgium (36%) and the United Kingdom (35%), while "Political Union" is recalled most often in Portugal (50%) and Denmark (18%). A "common defence policy" is most prominent among Greeks (11%); "common foreign policy" as well as "European citizenship" among the Portuguese (respectively 13% and 8%) and the "social dimension" among the British (11%). At least 50% of the Dutch (83%), Irish (57%), British (57%) and Greeks (50%) gave replies which, on first analysis of the results of this question, cannot be classified.

75% of EC citizens (always only those who have heard about the Maastricht Summit) believe it is "very important" or "important"; only 10% find it "not very important" or "not important at all" while 14% do not comment. In all member countries, the percentages of "very important/important" are enormous: they vary from 69% in Ireland to 83% in Portugal. The Netherlands, with hardly 16%, still has the highest percentage of "not very important/not important at all" (Table 3.5, Figure 3.1.).

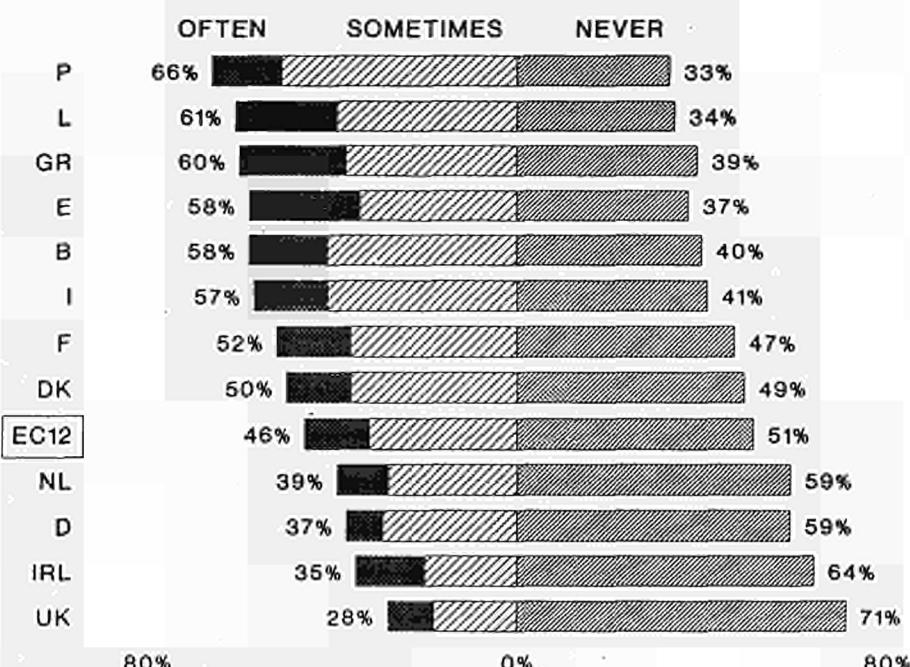

If Europeans are asked about the kind of effect (i.e. "positive effect", "no effect", "negative effect") they expect the Maastricht Treaty to have on "their life", "their country" or even "all the European Community", it is always the Portuguese, just as it is with the "effect of the Single Market" (Table 2.9.1) (once again, this might be called the "Presidential effect"), who are at the head of countries believing that these effects will be positive (Table 3.6.1, Figure 3.2.).

At the Community level, rather like the "effect of the Single Market" (Table 2.9.1), the more something directly touches the citizen, the more positive effects regress. The results for each item present themselves as follows:

- * An absolute majority of people interviewed in all EC countries thinks that the Maastricht Treaty will have a positive effect for "all the European Community" (from 58% of the French to 79% of Portuguese). The Community averages are 66% "positive effect", 6% "no effect" and 4% "negative effect"; 23% do not comment.

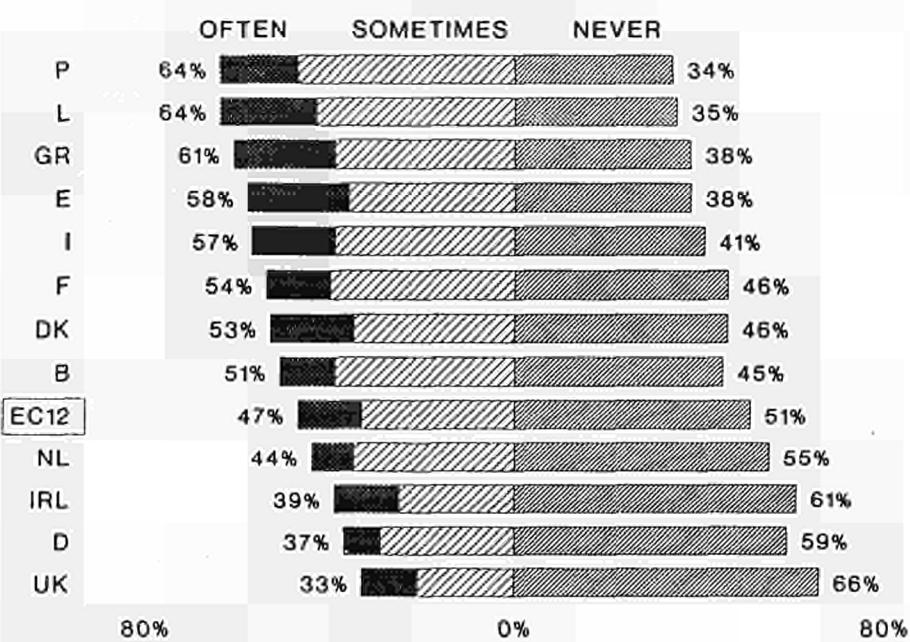

EUROBAROMETER 37

FREQUENCY OF FEELING EUROPEAN

EUROBAROMETER 37 - FIGURE 3.3.

FREQUENCY OF FEELING A CITIZEN OF EUROPE

EUROBAROMETER 37 - FIGURE 3.4.

- * An absolute or relative majority of people interviewed in all EC countries believes that the effect of this Treaty will be positive for "their country" (from 41% of Danes to 73% of Portuguese). The Community averages are: 54% "positive effect", 7% "no effect" and 13% "negative effect"; 26% do not comment.
- * Most Portuguese (51%), Spaniards (38%), Greeks (37%) and Irish people (36%) believe this Treaty will have a positive effect on "their life". Everywhere else, most people interviewed (from 29% in Denmark to 42% in the Netherlands) think that it will have no effect; in France, the rate of "no effect" (33%) is also as high as DK/NR (34%). It seems that the citizens of the poorest countries of the Community are those who have the highest hopes that their standard of life will improve thanks to decisions taken at Maastricht. The Community averages are: 29% "positive effect", 34% "no effect" and 8% "negative effect"; 29% do not comment.

This question has also been asked in the framework of the "Flash" survey organised among "Euro-Deciders" (see above). As shown in Table 3.6.2, whatever the country (or group of countries in the case of Benelux), the percentages of "positive effect" attain an absolute majority of at least 61% for "all the European Community" and "my country". Contrastingly, even though an absolute majority (60% !) of "Euro-Deciders" overwhelmingly await the "positive effect" of the Single Market on "their own life" (Table 2.9.2), only 39% (from 30% in Germany to 48% in Spain) expect such results from "Maastricht".

3.4 European Citizenship

On the occasion of the first Inter-Governmental Conference on Political Union (Rome 14/12/90), the Spanish government put on the table a document which aimed at introducing the idea of "European citizenship" into the new Union Treaty.

According to this proposal, the transition to a Political Union - comprising of an external policy, a common security and defence as well as an Economic and Monetary Union - fundamentally overturned the schemes which had prevailed until now : the establishment of such a Union demands the creation of a common integrated space, within which the European citizen will play a central role.

EUROBAROMETER 37

The Spanish proposal deals with the definition of a **citizenship of the European Political Union** conceived as the "personal and unalterable status of the nationals of the member states who, because of their belonging to the Union, have special rights and duties specific to the framework of the Union, which are exercised and are specifically protected within the borders of the Community, but this does not prejudge the possibility of claiming the status of European citizen as much outside those aforementioned borders".

The "Treaty on European Union", signed at Maastricht, has taken a great step in the direction of this issue of citizenship. It foresees, among other issues, that:

- * any citizen of the Union residing in a member state of which s/he is not a national, should have the right to vote and be eligible to stand at local elections and at European elections in that state;
- * on the territory of a third country where his/her state is not represented, any EC citizen should benefit from diplomatic and consular protection from any other member state; ...

In order to try and define the way in which EC citizens react when faced with the idea of "European citizenship", the EUROBAROMETER asked several questions on the subject. The main results are presented in the following paragraphs:

When EC citizens are asked if they feel not only their "national identity" but a "European identity" (i.e. that they are "Belgians", "Danes", "Germans"... but also "Europeans"), 46% agree that this happens "often" or "sometimes", while 51% say it "never" happens to them. The Portuguese (66% "often" or "sometimes"), Luxemburgers (61%), Greeks (60%), Belgians (58%), Spaniards (58%) and Italians (57%) are proportionally the most numerous in feeling this "European identity"; and it is, above all, the British (71% "never"), Irish (64%) and Germans as well as the Dutch (both 59%) who are proportionally the most numerous in not feeling that way (Table 3.7, Figure 3.3.).

If they are asked if they ever think of themselves not only as "(national) citizens" but also "**citizens of Europe**" (i.e. that they are "Belgian citizens", "Danish citizens", "German citizens"...but also "citizens of Europe"), the results do not differ much except in Belgium (58% "often/sometimes" "European" versus 51% "often/sometimes" a "citizen of Europe"⁸), the Netherlands (39% versus 44%), the United Kingdom (28% versus 33%) and Ireland (35% versus 39%). At the Community level, this difference is one point (Table 3.7, Figure 3.4.).

⁸ For Wallonia, Flanders and Brussels respectively, the results are 61%/54%, 54%/46% and 65%/71%. In Flanders and Wallonia, the influence of "European"/"citizen of Europe" terminology is understood in the same sense, while the opposite is true for Brussels.

In order to analyse further how EC citizens envisage this "European citizenship", this survey also carried the following question: "in the near future, do you see yourself as "(nationality) only" (i.e. only Belgian, Dane, German,...), as "(nationality) and European", "European and (nationality)" or "European only"?"? Unlike the two preceding questions, this question is not asked for the present time, but "in the future"(Table 3.8).

Responses to this question mainly show that, in the near future:

- * 48% of Europeans see themselves as "(nationality) and European". The Italians (57%) as well as Greeks and French (both 55%) are proportionally the most numerous in envisaging it.
- * 38% of Europeans see themselves as "(nationality) only". Above all, the British (54%) and Irish (52%) see themselves this way.

As detailed above, the Maastricht Treaty defines new political rights for Community nationals. What do respondents think about the fact that an EC citizen resident in another EC country would have the right...(Table 3.9, Figure 3.5.):

- * ... *to vote in local elections in that country?*

Views are very divided on this subject: 47% of people interviewed agree while 46% do not; 7% do not comment.

The highest percentage of favourable responses are found in Ireland (67%), Italy (55%), the Netherlands (55%), East Germany (54%) and Spain (54%); while the largest number of unfavourable responses are in Denmark (65%), Luxembourg (62%), West Germany (58%), Belgium (54%) and Greece (52%).

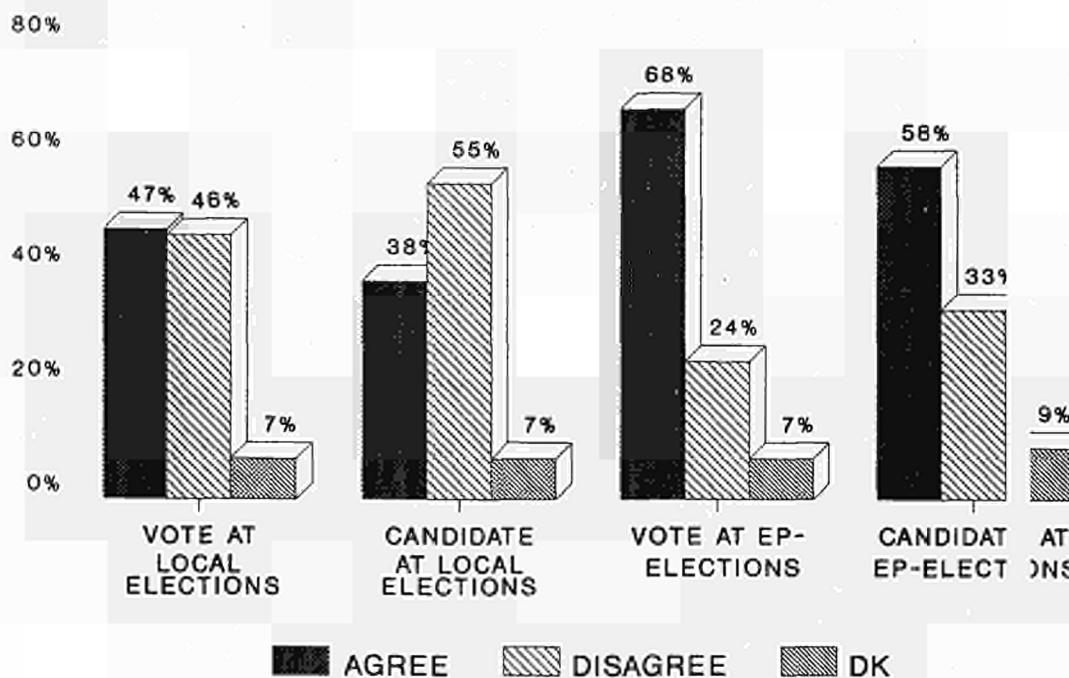

- * ... *to be a candidate for local elections in that country?*

An absolute majority of EC citizens oppose this possibility: 38% agree while 55% do not; 7% do not comment. A relative majority in Ireland (49%), Spain (48%), Italy (48%) and the Netherlands (47%) agree with this proposal. Everywhere else, absolute majorities of people "disagree"; these majorities are especially high in Luxembourg (76%), Denmark (71%), Greece (69%), West Germany (66%) and Belgium (64%).

- * ... *to vote in European elections in that country ?*

An absolute majority of EC citizens are in favour of this idea: 68% agree while 24% do not; 7% do not comment. The percentages of those who "agree" are high in all member countries, rising from 55% in Portugal and 58% in Denmark up to 81% in Ireland.

RIGHT TO VOTE AND TO BE A CANDIDATE FOR
CITIZENS OF ANOTHER EC COUNTRY
- EC 12

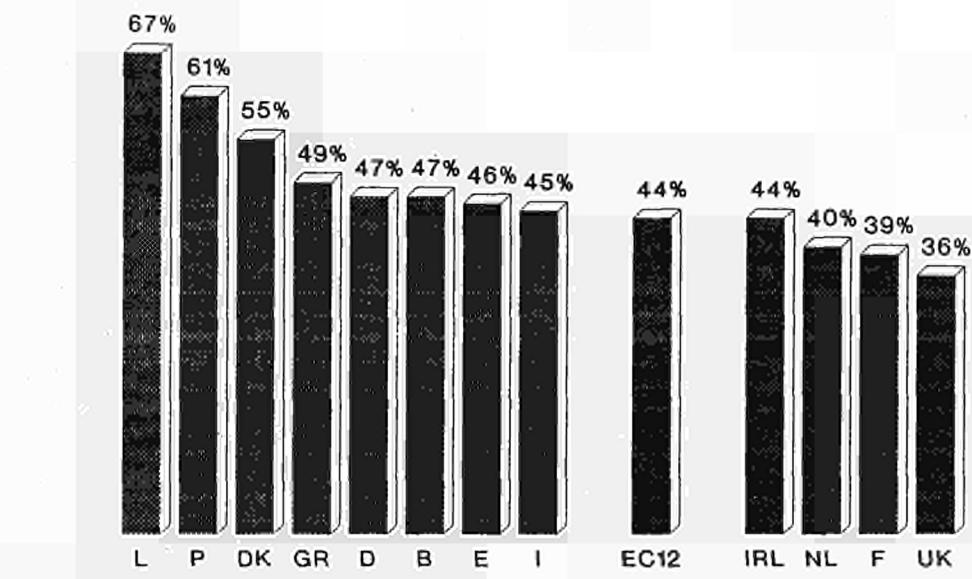

EUROBAROMETER 37 - FIGURE 3.5.

* *... to be a candidate for European elections in that country ?*

An absolute majority of EC citizens favour this possibility: 58% agree while 33% do not; 9% do not comment. The strongest majorities of "agree" are observed in Ireland (68%), the United Kingdom (67%) and the Netherlands (62%). Those who "disagree" are most frequently found in Denmark (52%).

4. THE EUROPEAN PARLIAMENT AND ITS FUTURE

4.1. Awareness and image of the European Parliament

During the second half of 1991, preparations for the Maastricht summit on 9 and 10 December 1991 (see above) placed the European Parliament at the centre of Community news. The role of this institution was, in fact, redefined by the numerous proposals discussed at Maastricht: its future relations with the Commission and Council (especially reinforcing Parliament's control of the budget) as well as its legislative powers (for a number of policy areas, the Maastricht Treaty foresees a real procedure of *co-decision* and no less exclusively, as is the situation now, a procedure of *consultation* and a procedure of *cooperation*; it also foresees extending the *assent procedure*, as well as other new powers).

During the first half of 1992, the European Parliament stayed at the centre of Community news, within the framework of developments concerning the Maastricht Accord. It had been joined in these discussions by the national parliaments of various member countries, which are in the process of deciding on the ratification of the "Treaty on European Union" ("Political Union" as well as "Economic and Monetary Union").

Despite what is at stake, only 44% of citizens interviewed declare they have "recently seen or heard, in the papers, on the radio or on television, anything about the European Parliament". The figure was 52% in Autumn 1991 at the time of the last survey (EB 36) (Table 4.1.1., Figure 4.1).

EUROBAROMETER 37

Awareness of the European Parliament is highest in Luxembourg (67%), Portugal (61%), and Denmark (55%). Compared to EB 36's data, the level of information about Parliament increased in Denmark (+ 7 points), Belgium (+ 3) and Luxembourg (+ 2); in other countries, it stayed the same or declined. The United Kingdom (36%, that is to say, the greatest fall: -20 points), France (39%, -9) and the Netherlands (40%, -13) are countries where awareness is the lowest.

Before continuing with analysing the results related to Parliament, it is useful to spend a little time stressing the fact that the two most "mediaworthy" institutions of the European Community (Commission and Parliament) are frequently not connected in the minds of European citizens:

- * among the 42% of Europeans who have recently heard about the Commission (Table 1.16), 69% have recently heard of Parliament, 25% have not heard of it, and 6% do not comment. In a similar fashion, among the 44% of Europeans who have recently heard about Parliament, 66% have recently heard about the Commission, 28% have not heard of it, while 6% do not comment;
- * it is also not surprising that 57% of Europeans have recently heard of either the Commission, or the Parliament, or even both these institutions. What is more, absolute majorities exist in all member states for this "all-inclusive Commission/Parliament awareness", varying from 51% in the United Kingdom, 52% in the Netherlands, 53% in Spain, up to 75% in Luxembourg (Table 4.1.2.).

Always bearing in mind this "lack of connection", it is useful to clarify that, among the 66% of Europeans who HAVE recently heard about the European Community, only 55% and 56% respectively say they have heard of the Commission and Parliament. These results perhaps give additional proof to the fact that the EC citizen finds all the Community machinery extremely complicated (Table 4.1.3.).

Among people who have recently heard about Parliament, an absolute majority (53%) have a favourable impression of it; this constitutes an increase of 3 points since EB36, which is counterbalanced by an equivalent decrease in neutral impressions (unfavourable impressions staying stable at the very low level of 17%) (Table 4.2, Figure 4.2.).

The highest rate of positive attitudes can be observed in Portugal (74%), Greece (67%) as well as Ireland and Italy (66%); and the highest rate of negative attitudes in Denmark (36%) and the Netherlands (33%).

Compared with the last survey, **favourable** opinions increased the most in Spain (64%, +12) and the rise of **unfavourable** opinions is the most clear-cut in West Germany (+7); negative attitudes have shown a decline of 7 points in the United Kingdom (30%). With the exception of Denmark (34% versus 36%) and the Netherlands (32%/33%), positive impressions are at least 12 points higher than negative impressions.

It is noteworthy that the citizens of the country which has assumed the Presidency of the Council (Portugal) are proportionally the most numerous in having retained as much of a positive impression of the Commission (Table 1.17) as of Parliament.

When asked to cite the towns which host the European Parliament (see Chapter 1; Section 1.1), correct responses (Brussels and/or Strasbourg and/or Luxembourg) are in the majority (55%).

4.2 Current and desired role of the European Parliament

The current role of the European Parliament is judged "very important" or "important" by 55% of people interviewed, and "not very important" or "not at all important" by 27%; these results are almost identical to those of Autumn 1991 (Table 4.3).

The rates of "very important/important" are the highest in Portugal (74%), Ireland (68%) and Luxembourg (66%); the Netherlands' rate is the lowest (42%, that is to say the only rate under 50%) and its percentage of "not very important/not at all important" is the strongest (46%).

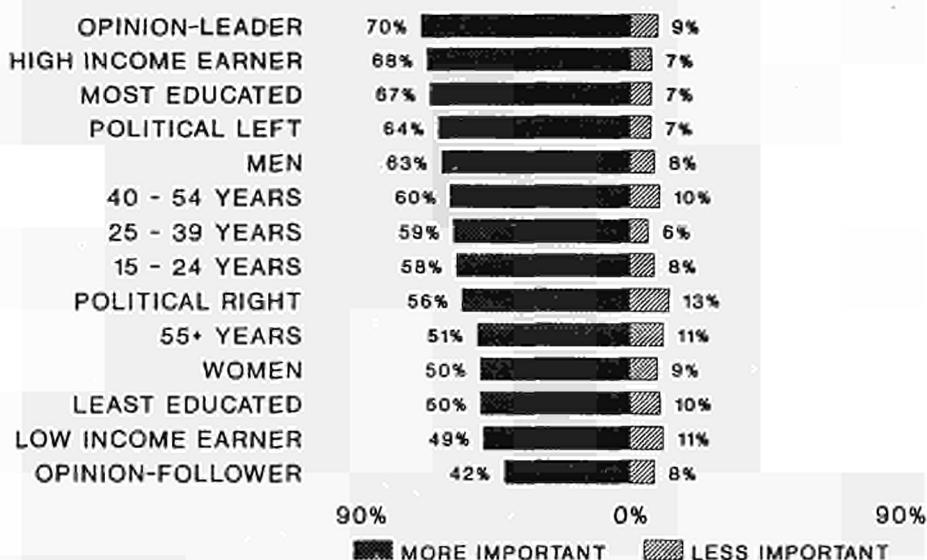

In the course of six months, "very important/important" responses have gone up the most in Belgium (+11) and Denmark (+9); as to the percentage of "not very important/not at all important" replies, the highest increase is observed in East Germany and Luxembourg (both +4).

As shown in Table 4.4, most EC citizens consider that the EC's parliamentary assembly plays an "important" rather than "unimportant" role in various EC policy areas:

- * ***Environmental protection policy***: 63% consider the role of Parliament as "important" (versus 17% "unimportant"). This opinion is mainly shared by East Germans (78% versus 11%, West Germany: 61%/25%) and clearly less by the Danes (53%/29%, that is to say, still an absolute majority saying "important").
- * ***European social policy*** : 54% find Parliament's role "important" (versus 22% "unimportant"). At 68% (versus 9%), the Portuguese are proportionally the most numerous in stating this opinion, while the Danes are proportionally the least numerous, with theirs being the only result showing a relative majority of "unimportant" opinions (32% versus 44%).

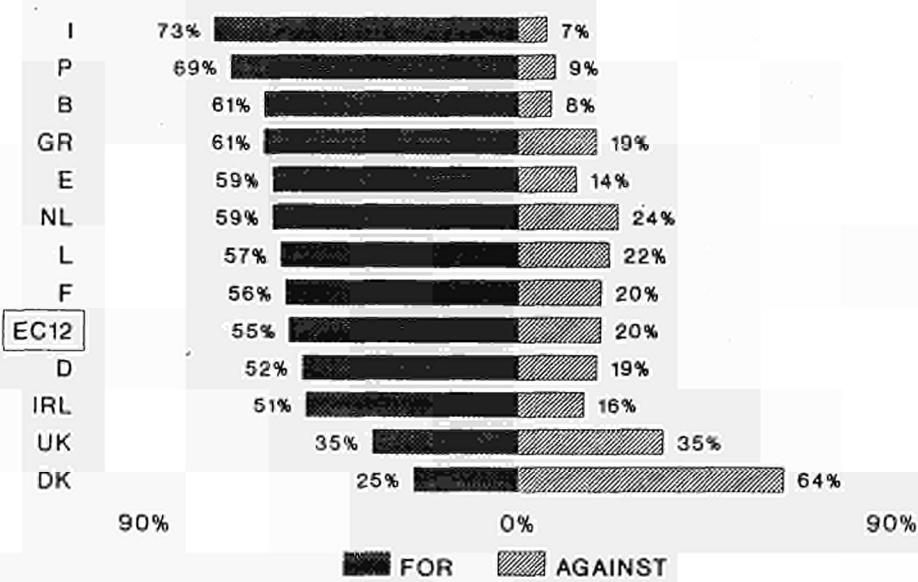

EUROBAROMETER 37

WHO SUPPORTS EUROPEAN PARLIAMENT
BECOMING MORE IMPORTANT ?

EUROBAROMETER 37 - FIGURE 4.3.

FOR OR AGAINST A EUROPEAN GOVERNMENT?
- BY COUNTRY

EUROBAROMETER 37 - FIGURE 4.4.

- * ***Student exchange policy*** : 51% assess the role of Parliament as "important" (versus 22% "unimportant"). This view is held the most by Luxemburgers (60%/22%) and the Irish (57%/12%); it is refuted the most by Danes (46%/30%, that is to say, still a very comfortable relative majority of "important").
- * ***Consumer protection policy*** : 50% find the Parliament's role "important" (versus 25% "unimportant"). This view is espoused above all by the Portuguese (62%/13%) and Irish (61%/12%); Denmark is the only country where a majority of "important" responses does not surface (37%/37%).
- * ***The common recognition of qualifications*** : 45% judge Parliament's role "important" (versus 27% "unimportant"). Luxemburgers (63%/21%) are proportionally the most numerous in recognising the importance of Parliament in this field; while the Danes (42%/35%) as well as the French (41%/39%, that is to say, still a relative small majority saying "important") are proportionally the most numerous in denying its importance.
- * ***Policies in favour of families, women and old people*** : 40% assess the role of Parliament as "important" (versus 32% "unimportant"). This view holds the most true in Ireland (56%/16%) while it is the most often rejected in Denmark (22%/47%) as well as in France (28%/49%).

Most EC citizens (56%, that is to say, 3 points fewer than six months previously) want Parliament to play a more important role than it does now, 16% (the same as EB 36) think this role should remain about the same and 9% (+1) assess that it should be attributed a less important role (Table 4.5).

Above all others, the Portuguese (73%), Italians (67%) and Dutch (66%) register favourable opinions concerning increasing the European Parliament's powers; Danes register the least (32% versus 27% (the maximum) unfavourable opinions).

Since Autumn 1991, support for this enlargement of powers suffered its greatest fall in Belgium (-7) (this fall having been completely compensated for by a rise in the response "about the same role") while it rose the most in Portugal (+7) as well as Luxembourg (+6).

Unsurprisingly (see previous chapters), the profile of individuals who support the European Parliament playing a more important role is as follows: more likely men than women, well educated, on the left of the political spectrum, more likely an "opinion-leader" and disposing of a high income (Table 4.6, Figure 4.3).

4.3 Political Union - prospects for a European government

More than half of EC citizens (55%) favour the formation of a European Union with a European government responsible to the European Parliament, a fifth (20%) oppose the idea while a quarter (25%) does not comment on the question. These percentages are almost identical to those observed in Autumn 1991 (Table 4.7.1, Figure 4.4.).

The most likely to agree to such a government are Italians (73%) as well as Portuguese (69%), while the least likely to agree are the British (35%) and Danes (25%). In all member countries except the United Kingdom (35%/35%) and Denmark (25% "for", 64% "against"), absolute majorities come out in favour of a European government. Since EB 36, support for this idea has made considerable progress in Luxembourg (+9) and Portugal (+8); in Denmark, those rejecting the idea increased by 4 points (the biggest rise).

Among Euro-Deciders ⁹, as shown in Table 4.7.2, 73% have favourable opinions and 23% unfavourable opinions. These proportions vary from 38%/59% in the United Kingdom to 94%/5% in Italy.

In the context of the debate concerning the Treaty on Political Union ("Maastricht"), EC citizens are in favour (62% versus 17%) of "the European Parliament having the right to decide together with the Council of Ministers representing national governments, on the legislation of the European Community". This idea is carried by an absolute majority in all countries except Denmark (41% "in favour", 46% "not in favour") and, but only just, in the United Kingdom (50% "in favour", 27% "not in favour", that is to say, a large relative majority of favourable opinions). The biggest support for this co-legislation can be observed among the Italians (71%), Dutch (70%) and French (69%) (Table 4.8).

⁹"Flash" survey carried out in 8 EC countries - see above and Annexes

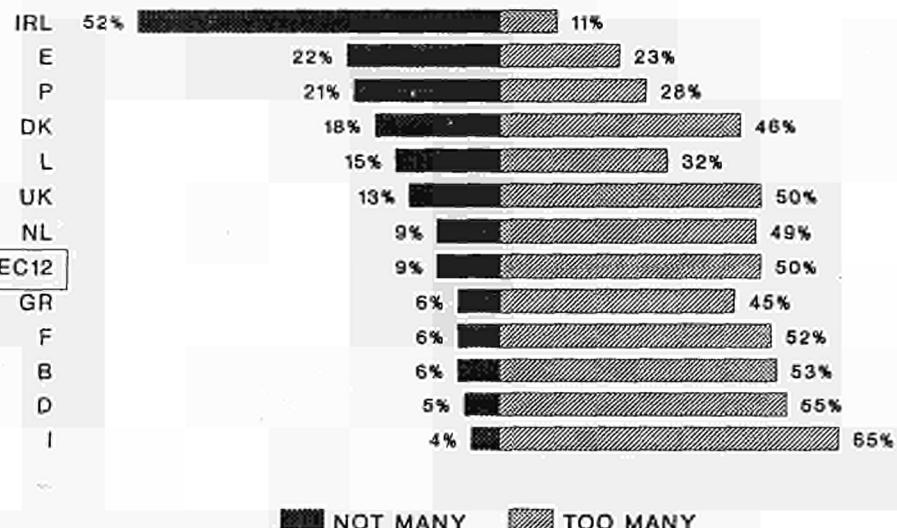

5. ISSUES FACING EUROPEAN SOCIETY

Within the framework of the 37th wave of the EUROBAROMETER (Spring 1992), several special studies were carried out on behalf of the European Parliament (see Chapter 4) and various specialised services of the European Commission. The main studies are about opinions concerning the environment, views connected with various questions on social security (health insurance, pensions...) and perceptions of various public health issues, particularly the drug problem.

Detailed analyses of the surveys requested by specialised services of the Commission will be presented in special reports at a later stage (please see the Annexes for the current list of these reports). By way of illustration, two questions of general interest can, however, already be subjected to a preliminary analysis and presented in this report.

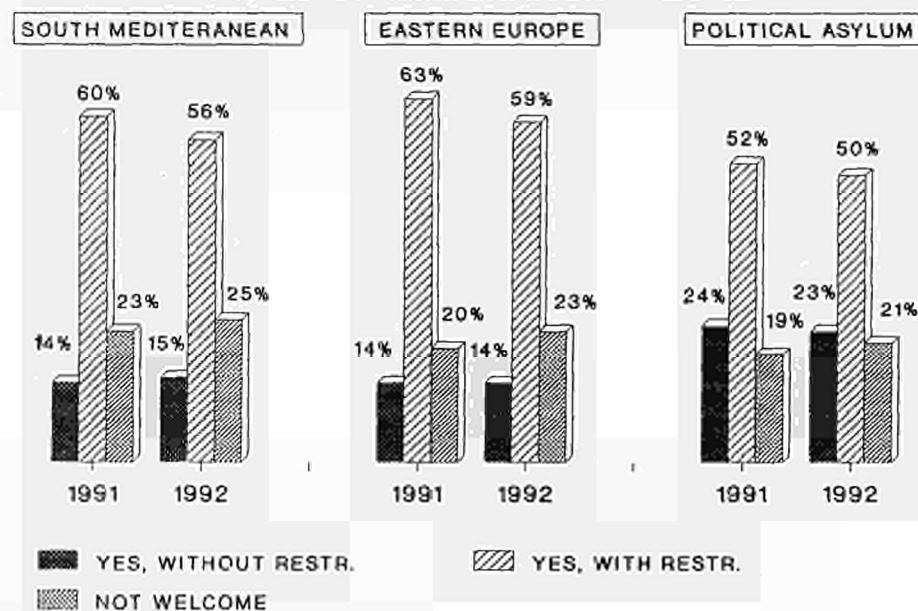

EUROBAROMETER 37

PRESENCE, IN ONE'S COUNTRY, OF PEOPLE
COMING FROM NON EC COUNTRIES
- BY COUNTRY

EUROBAROMETER 37 - FIGURE 5.1.

WELCOME TO BE AFFORDED TO DIFFERENT
TYPES OF IMMIGRATION - EC 12

EUROBAROMETER 37 - FIGURE 5.2.

5.1 Perceptions of the "Alien" - problems of immigration

On two occasions, the European Parliament has appointed a Commission of Enquiry on Racism and Xenophobia in Europe. In its final report (December 1985), the first commission recommended that a EUROBAROMETER survey be carried out to gauge the feelings of EC citizens on the question.

Appointed in 1989, the second parliamentary commission has also proposed in its conclusions (October 1990) that "surveys on the issue of racism and xenophobia be should conducted regularly within the framework of the EUROBAROMETER".

The immigration problem originating from non-EC countries is a major worry to other Community institutions as well. To that end for instance:

- * in June 1986, the European Parliament, the Council, representatives of member states brought together within the Council and the Commission have signed an "Inter-Institutional Declaration against Racism and Xenophobia";
- * in 1989, a draft resolution of the Commission concerning the fight against racism and xenophobia was submitted to the Council;
- * on 11 October 1991, the Commission presented a communication on immigration to the Council and Parliament.

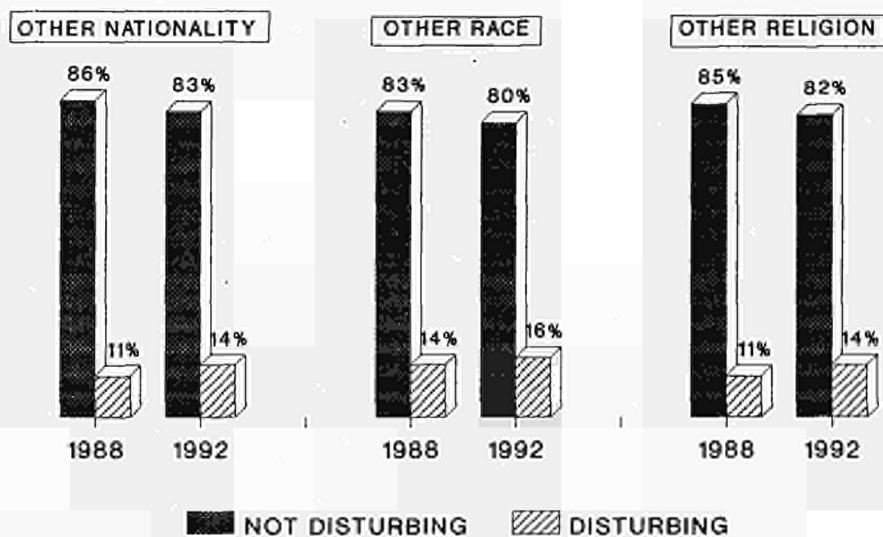

To meet this information need, some questions on that topic had been asked in the framework of this EB 37. In this section, we propose briefly to run through the results relating to those questions.

In Spring 1992, 50% of Europeans state that "generally speaking", too many " people who are not nationals of EC countries" live in their country; 35% think that they are "a lot but not too many" and 9%, that they are "not many"; those figures are statistically the same as those reported a year ago in EB 35 (Table 5.1, Figure 5.1.).

The feeling that there are too many non-EC foreigners is, above all, a characteristic of Italians (65%, or +2 points compared to EB 35) and the citizens of traditional host countries, i.e. West Germans 57%, -1; the East Germans: 48%, +3), Belgians (53%, -3) and the French (52%, -4).

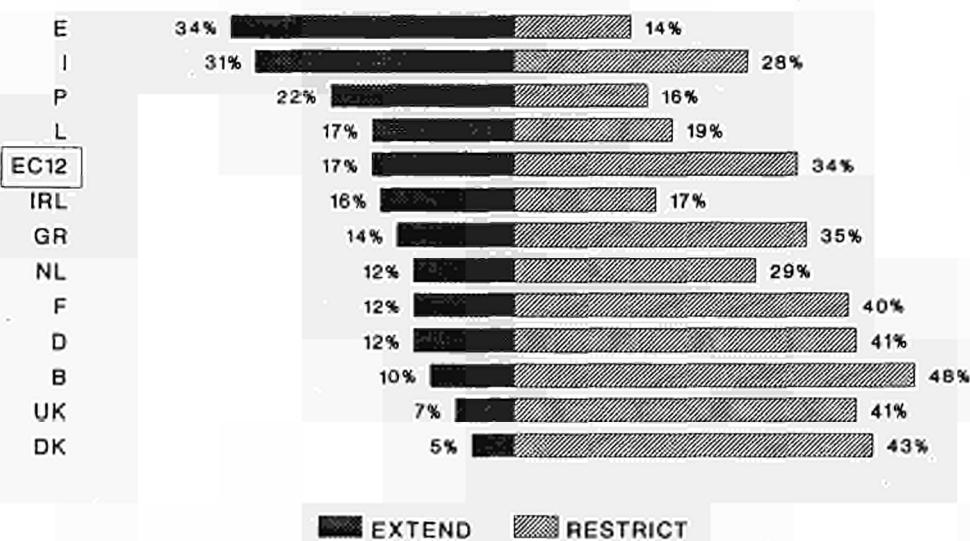

EUROBAROMETER 37

PRESENCE OF "ALIENS": DISTURBING OR NOT?
- EC 12

EUROBAROMETER 37 - FIGURE 5.3.

RIGHTS OF IMMIGRANTS IN THE EC:
EXTEND OR RESTRICT?
- BY COUNTRY

EUROBAROMETER 37 - FIGURE 5.4.

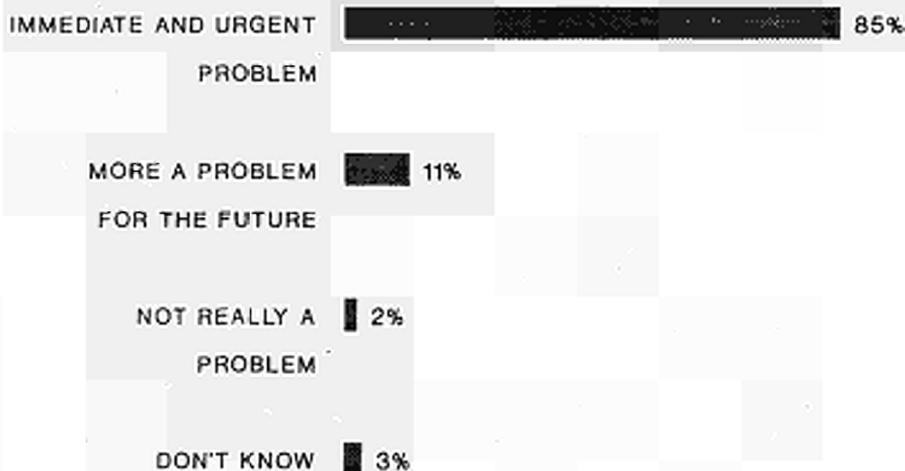

52% (as before) of the Irish feel that there are "not many" "people who are not nationals of EC countries" living in their country; respectively 26% (as before) and 11% (-1) feel that there are "a lot but not too many" and "not many". Greece, Luxembourg and Portugal show the highest increase in "too many" responses: for each of these three countries, the increase is 16, 12 and 10 points respectively.

The country of origin of this immigration, or the reasons for it, have an impact on opinions concerning the welcome these people receive (Table 5.2, 5.3 and 5.4; Figure 5.2):

- * ***When people come from countries south of the Mediterranean and wish to work in the EC***, 15% (+1 point compared with EB 35) of EC citizens feel that "here in the EC", "we should accept them without restrictions", 56% (-4) that "we should accept them but with restrictions" and 25% (+2) that "we should not accept them"; 5% (+2) do not comment. As in Spring 1991, the answers "without restrictions" are proportionally the most numerous in Spain (36%, +2) and Portugal (32%, along with Luxembourg the biggest drop: -6). In Denmark (37%, the highest increase +12), France (34%, +1), the Netherlands (34%, +6) and Belgium (33%, -1), the percentage of "should not accept them" responses are the highest.
- * ***When people come from Eastern Europe and wish to work in the West***, 14% (as before) of EC citizens feel that "we should accept them without restrictions", 59% (-4) that "we should accept them but with restrictions" and 23% (+3) that "we should not accept them; 5% (+2) do not comment. "Without restrictions" are proportionally the most numerous in Spain (38%, +2) and Portugal (32%, as before); this was the case as well in Spring 1991. The percentage of "should not accept them" responses are the highest in West Germany (33%, +7, East Germany: 28%, +5), Greece (30%, +6) as well as in Denmark (29%, that is to say, the highest increase: +10) and the Netherlands (29%, +7).
- * ***When people suffering human rights violations in their country seek political asylum***, 23% (+1) of EC citizens state that "we should accept them without restrictions", 50% (-2) that "we should accept them but with restrictions" and 21% (+2) that "we should not accept them"; 7% (+1) do not comment. As in Spring 1991, "without restrictions" responses are proportionally the most numerous in Spain (47%, +1); in Denmark, the percentage of these responses falls from 38% to 28%, but the rate of "not accept them" responses stays very low compared to other member countries (moving from 8% to 10%).

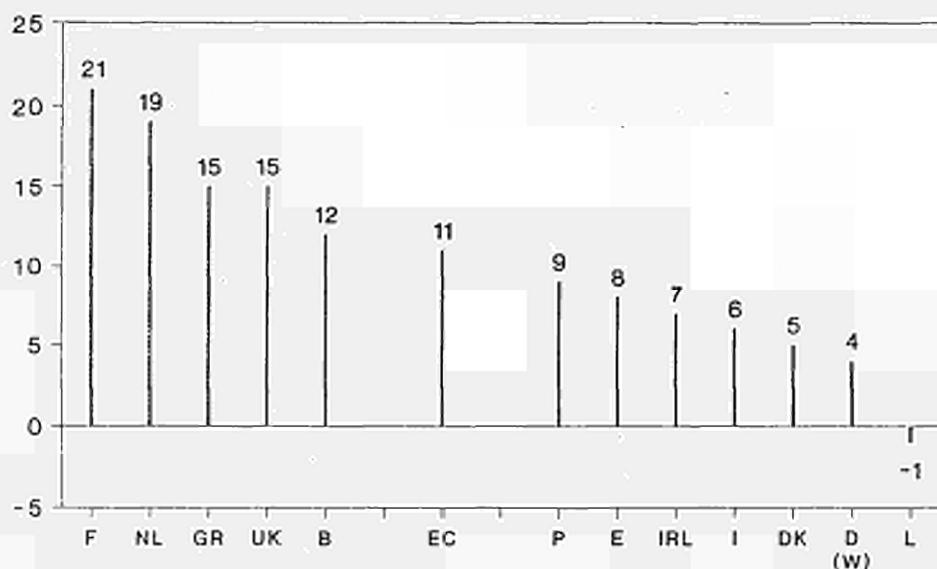

EUROBAROMETER 37

URGENCY OF ENVIRONMENTAL PROTECTION
PROBLEM - EC 12

EUROBAROMETER 37 - FIGURE 5.5.

PROTECTING THE ENVIRONMENT: IMMEDIATE
AND URGENT PROBLEM - NATIONAL SHIFTS
BETWEEN EB29 AND EB37

EUROBAROMETER 37 - FIGURE 5.6.

As in Spring 1991, the percentage of "not accept them" responses are the highest in Belgium (29%, as before), West Germany (29%, +2; East Germany: 12%, +1) and France (29%, an increase of 5 points, that is to say, after Luxembourg (+6), the highest increase registered).

At least eight out of ten EC citizens perceive the presence of the "alien" as "not disturbing", whether of a different nationality (83%, -3 points since EB 30 of Autumn 1988), race (80%, -3) or religion (82%, -3). This declared great tolerance towards aliens varies a great deal depending on the member state, but it never goes lower than the 64% limit (in Denmark, on the question of "another religion") (Tables 5.5, Figure 5.3).

Questioned about the rights people coming from non-EC countries should enjoy in their country, 17% of Europeans (-2 since EB 35) think their rights "should be extended"; 39% (as before) think they "should be left as they are" and 34% (+1), that they "should be restricted"; 10% (+1) do not comment (Table 5.6, Figure 5.4.).

As in Spring 1991, people in favour of extending the rights of non-EC immigrants are proportionally more numerous in Spain (34%, as before) and Italy (31%, -7 points, the greatest fall after Greece (-8)). As was also the case in Spring 1991, Belgians (48%, -2) are proportionally the most numerous in declaring themselves in favour of restricting rights. The strongest rise in the percentage of people favouring such a restriction is in Denmark (43%, +11).

5.2 Concern about the environment

Since EB 29 (Spring 1988), and across all countries (except Luxembourg which remains as before: 83% versus 84%), a rising proportion of people interviewed consider protecting the environment and fighting pollution "an immediate and urgent problem" (Table 5.7, Figures 5.5. and 5.6.).

The rise varies between 4 points (in West Germany: 88% versus 84%) to 21 points (in France: 59% versus 80%); a Community average of 11 points (85% versus 74%). At least seven out of ten citizens currently hold this opinion in all Community countries. Thus, in the eyes of Europeans, proposals under discussion at the "Rio Summit" (Rio de Janeiro, Brazil 03/06/1992 - 14/06/1992) were of utmost importance!

STANDARD EUROBAROMETER 37.0 - TECHNICAL SPECIFICATIONS

Between March 18 and April 15 1992, INRA (EUROPE), a European Network of Market- and Public Opinion Research agencies, carried out wave 37.0 of the STANDARD EUROBAROMETER, on request of the COMMISSION OF THE EUROPEAN COMMUNITIES.

The EUROBAROMETER 37.0 covers the population of the respective nationalities, aged 15 years and over, in each of the Member States of the European Community. The basic sample design applied in all Member States is a multi-stage, random (probability) one. In each EC country, a number of sampling points was drawn with probability proportional to population size (for a total coverage of the country) and to population density.

For doing so, the points were drawn systematically from all "administrative regional units", after stratification by individual unit and type of area. They thus represent the whole territory of the Member States according to the EUROSTAT-NUTS II and according to the distribution of the national, resident population in terms of metropolitan, urban and rural areas. In each of the selected sampling points, a starting address was drawn, at random. Further addresses were selected as every Nth address by standard random route procedures, from the initial address. In each household, the respondent was drawn, at random. All interviews were face-to-face in people's home and in the appropriate national language.

<u>COUNTRIES</u>	<u>INSTITUTES</u>	<u>N° INTERVIEWS</u>	<u>FIELDWORK DATES</u>	<u>POPULATION 15+ (x 000)</u>
Belgium	MARKETING UNIT	1036	23/03 - 04/04	7 994.4

The Netherlands	NIPO	1002	21/03 - 03/04	11 603.6
Portugal	NORMA	1000	24/03 - 10/04	7 718.7
Great Britain	MAI International Market Res.	1016	18/03 - 10/04	44 562.0
Northern Ireland	ULSTER MARKETING SERVICES	303	19/03 - 05/04	1159.1

For each country a comparison between the sample and the universe was carried out. The Universe description was derived from EUROSTAT population data. For all EC member-countries a national weighting procedure, using marginal and intercellular weighting, was carried out based on this Universe description. As such in all countries, minimum sex, age, region NUTS II and size of locality were introduced in the iteration procedure. For international weighting (i.e. EC averages), INRA (EUROPE) applies the official population figures as published by EUROSTAT in the Regional Statistics Yearbook of 1988. The total population figures for input in this post-weighting procedure are listed above.

The results of the EUROBAROMETER studies are reported in the form of tables, datafiles and analyses. Per question a table of results is given with the full question text (English and French) on top; the results are expressed 1) as a percentage on total base and 2) as a percentage on the number of "valid" responses (i.e. "Don't Know" and "No Answer" excluded). All EUROBAROMETER datafiles are stored at the Zentral Archiv (Universität Köln, Bachemer Strasse, 40, D-5000 Köln 41). They are at the disposal of all institutes members of the European Consortium for Political Research (Essex), of the Inter-University Consortium for Political and Social Research (Michigan) and of all those interested in social science research. The results of the EUROBAROMETER surveys are analysed and made available through the Unit "Surveys, Research, Analyses" of DG X of the Commission of the EC, "EUROBAROMETER", Rue de la Loi 200, B-1049 Brussels.

Readers are reminded that survey results are estimations, the accuracy of which, everything being equal, rests upon the sample size and upon the observed percentage. With samples of about 1.000 interviews, the real percentages vary within the following confidence limits :

Observed percentages	10% or 90%	20% or 80%	30% or 70%	40% or 60%	50%
Confidence limits	± 1.9%	± 2.5%	± 2.7%	± 3.0%	± 3.1%

EUROBAROMETRE STANDARD 37.0 - SPECIFICATIONS TECHNIQUES

Entre le 18 mars et le 15 avril 1992, INRA (EUROPE), un réseau européen d'agences d'études de marché et d'opinion publique, a réalisé la vague 37.0 de l'EUROBAROMETRE STANDARD, à la demande de la COMMISSION DE LA COMMUNAUTE EUROPÉENNE.

L'EUROBAROMETRE 37.0 couvre la population nationale, de 15 ans et plus, dans chaque Etat membre de la Communauté Européenne. Le principe d'échantillonnage appliqué dans tous les Etats membres est une sélection aléatoire (probabiliste) à multiples phases. Dans chaque pays CE, divers points de chute ont été tirés avec une probabilité proportionnelle à la taille de la population (afin de couvrir la totalité du pays) et à la densité de la population.

Pour ce, ces points de chute ont été tirés systématiquement dans chacune des "unités régionales administratives", après avoir été stratifiés par unité individuelle et par type de région. Ils représentent ainsi l'ensemble du territoire des Etats membres, selon les EUROSTAT-NUTS II et selon la distribution de la population résidente nationale en termes de régions métropolitaines, urbaines et rurales. Dans chacun des points de chute sélectionnés, une adresse de départ a été sélectionnée aléatoirement. D'autres adresses ont ensuite été sélectionnées, comme chaque adresse N, par des procédures de "random route" à partir de l'adresse initiale. Dans chaque ménage, le répondant a été tiré aléatoirement. Toutes les interviews ont été réalisées en face-à-face chez les répondants et dans la langue nationale appropriée.

Northern Ireland	ULSTER MARKETING SERVICES	303	19/03 - 05/04	1159.1

Dans chaque pays, l'échantillon a été comparé à l'univers. La description de l'univers se base sur les données de population EUROSTAT. Pour tous les Etats membres CE, une procédure de pondération nationale a été réalisée (utilisant des pondérations marginales et croisées), sur base de cette description de l'univers. Dans tous les pays, au moins le sexe, l'âge, les régions NUTS II et la taille de l'agglomération ont été introduits dans la procédure d'itération. Pour la pondération internationale (i.e. les moyennes CE), INRA (EUROPE) recourt aux chiffres officiels de population, publiés par EUROSTAT dans l'Annuaire 1988 des Statistiques Régionales. Les chiffres complets de la population, introduits dans cette procédure de post-pondération, sont indiqués ci-dessus.

Les résultats des études EUROBAROMETRE sont analysés et sont présentés sous forme de tableaux, de fichiers de données et d'analyses. Pour chaque question, un tableau de résultats est fourni, accompagné de la question complète (en anglais et en français) en tête de page; ces résultats sont exprimés 1) en pourcentage calculé sur la base totale et 2) en pourcentage calculé sur le nombre de réponses "valables" (i.e. "Ne sait pas" et "Sans réponses" exclus). Tous les fichiers de données de l'EUROBAROMETRE sont déposés au Zentralarchiv (Universität Köln, Bachemer Strasse 40, D-5000 Köln 41). Ils sont à la disposition de tous les instituts membres du "European Consortium for Political Research" (Essex), du "Inter-University Consortium for Political and Social Research" (Michigan) et de toute personne intéressée par la recherche en sciences sociales. Les résultats des enquêtes EUROBAROMETRE sont analysés par l'unité "Sondages, Recherches, Analyses" de la DG X de la Commission de la CE, "EUROBAROMETRE", Rue de la Loi 200, B-1049 Bruxelles ; ils peuvent être obtenus à cette adresse.

Il importe de rappeler aux lecteurs que les résultats d'un sondage sont des estimations dont l'exactitude, toutes choses égales par ailleurs, dépend de la taille de l'échantillon et du pourcentage observé. Pour des échantillons d'environ 1.000 interviews, le pourcentage réel oscille dans les intervalles de confiance suivants :

Pourcentage observé	10% or 90%	20% or 80%	30% or 70%	40% or 60%	50%
Intervalle de confiance	± 1.9%	± 2.5%	± 2.7%	± 3.0%	± 3.1%

FICHE TECHNIQUE

FLASH 11

Etude réalisée pour: EUROBAROMETRE

Dates de terrain : Du 6 avril au 30 avril 1992

Méthodologie : Sondage postal, centralisé à Paris, effectué auprès d'un échantillon de 600 personnalités européennes faisant partie du Panel Eurodécideurs de la SOFRES et appartenant aux segments suivants:

- Dirigeants d'entreprise (55%)
- Experts financiers (27%)
- Relais d'opinion (18%): Journalistes économiques / financiers et professeurs d'université.

Zones d'enquête : Allemagne, Bénélux, Espagne, France, Grande-Bretagne, Italie

TECHNICAL DATA

FLASH 11

Study realised for: EUROBAROMETER

Field dates : **From April 6 to April 30 1992**

Methodology : **Mail survey, coordinated from Paris, among a sample of 600 European individuals, forming part of the SOFRES panel of Eurodeciders and belonging to the following segments:**

- Managers (55%)**
- Financial experts (27%)**
- Opinion relays (18%): economic/financial journalists and university professors**

Survey regions : **Germany, Benelux, Spain, France, Great-Britain, Italy**

(*) Replies to this open-ended question have been reorganised into "incorrect responses" and "correct responses". To better define the latter group of answers, answered by a majority of people (EC12 average : 86%), the "correct responses" have been further divided into two sub-categories : a) those who made specific reference to a EC/European flag or symbol; and b) the others / Les réponses à cette question ouverte ont d'abord été regroupées en "réponses incorrectes" et "réponses correctes". Pour affiner ce dernier groupe, largement majoritaire (moyenne CE12 : 86%), les "réponses correctes" ont ensuite été scindées en deux sous-groupes : a) les réponses faisant explicitement référence au drapeau ou au symbole européen/CE; et b) les autres.

Table/Tableau 1.22 : OPINION ON THE EUROPEAN FLAG / Opinion sur le drapeau européen (averages/moyennes, by country/par pays)

QUESTION : This symbol is the European flag. I have a list of statements concerning it. I would like to have your opinion on each of these. Number 1 indicates that you fully agree with the statement on the left-hand side of this scale. Number 10 indicates that you fully agree with the statement on the right-hand side of the scale. All figures between 1 and 10 can be used to indicate the extent to which you agree /Ce symbole est le drapeau européen. Voici une liste de propositions le concernant. Pourriez-vous me donner votre opinion sur chaque proposition. La note 1 veut dire que vous êtes tout à fait d'accord avec l'opinion à gauche de l'échelle. La note 10 veut dire que vous êtes tout à fait d'accord avec l'opinion à droite de l'échelle. Toutes les notes entre 1 et 10 peuvent être utilisées pour nuancer votre opinion.

Statements/Propositions:

1. 1= I don't like this flag/Je n'aime pas ce drapeau
10= I like this flag/J'aime ce drapeau
2. 1= I am not proud of this flag/Je ne suis pas fier de ce drapeau
10= I am proud of this flag/Je suis fier de ce drapeau
3. 1= I don't consider this flag to be mine/Je ne considère pas ce drapeau comme le mien
10= I consider this flag to be mine/Je considère ce drapeau comme le mien
4. 1= This flag stands for something which is not good/Ce drapeau représente quelque chose qui n'est pas bien
10= This flag stands for something good/Ce drapeau représente quelque chose de bien
5. 1= This flag should not be seen on all public buildings in (OUR COUNTRY) next to the national flag/Ce drapeau ne devrait pas se trouver sur tous les bâtiments publics de (NOTRE PAYS) à côté du drapeau national
10= This flag should be seen on all public buildings in (OUR COUNTRY) next to the national flag/Ce drapeau devrait se trouver sur tous les bâtiments publics de (NOTRE PAYS) à côté du drapeau national

Table/Tableau 2.2 : EVALUATION OF PROPOSED COMMON AGRICULTURAL POLICY REFORMS / Evaluation des réformes proposées pour la Politique Agricole Commune (% , by country/par pays)

QUESTION : In order to stop the growth in agricultural surpluses, the European Commission is planning to reform the Common Agricultural Policy. This would not reduce the European Community's spending and might even increase it in the near future. This reform provides for a more balanced distribution of funds by progressively replacing guaranteed high prices to all farmers with direct income assistance to small and middle sized farms. Do you think that this reform would be a good thing or a bad thing ? / Pour arrêter la croissance des excédents agricoles, la Commission Européenne envisage une réforme de la Politique Agricole Commune. Elle ne réduirait pas les dépenses de la Communauté Européenne et pourrait même les augmenter dans un avenir proche. Cette réforme prévoit une distribution plus égale des fonds en remplaçant progressivement les prix élevés garantis à tous les agriculteurs par des aides directes aux revenus des petites et moyennes exploitations. Pensez-vous que cette réforme soit une bonne chose ou une mauvaise chose?

(***) Response to question "Have you recently heard or read something about the European Community (the EC) or the European Economic Community (the EEC) or not?" /Réponse à la question "Avez-vous récemment entendu ou lu quelque chose au sujet de la Communauté Européenne (la CE) ou de la Communauté Economique Européenne (CEE)?"

Table/Tableau 2.8 : THE SOCIAL DIMENSION OF THE SINGLE MARKET - A GOOD THING ? / La dimension sociale du Marché Unique - Une bonne chose ? (% , by country/par pays)

QUESTION : The European Community is committed to complementing the Single European Market with a social dimension. This consists of a basic set of rules, for example, concerning the rights and duties of workers and employers in all the member countries. In your opinion, is such a European social dimension a good thing or a bad thing ? / La Communauté Européenne s'est engagée à accompagner le Grand Marché Européen d'une dimension sociale. Celle-ci consiste en une base commune de règles, par exemple, sur les droits et devoirs des travailleurs et des employeurs de tous les pays membres. A votre avis, est-ce qu'une telle dimension sociale européenne est une bonne chose ou une mauvaise chose ?

TECHNICAL SPECIFICATIONS FOR SOCIO-DEMOGRAPHIC AND SOCIO-POLITICAL VARIABLES USED IN CROSSTABULATIONS

SOCIO -PROFESSIONAL STATUS

Roughly half of our representative sample of the EC public is without paid work. Answers to the question "What is your occupation ?" show the following distribution:

OCCUPATION OF THE PERSON INTERVIEWED (n = 12.800) (weighted percentage for EC 12+ - EB37.0)

Self - employed

(1)	Farmer	2
(2)	Fishermen	0
(3)	Professional (lawyer, medical practitioner,accountant, etc.)	2
(4)	Owners of shops or companies, craftsmen, business proprietors	5
(5)	Business proprietors, owner (full or partner) of a company	2

Employed

(6)	Employed professional (employed lawyer, practitioner, accountant)	1
(7)	General management, director or top management	2
(8)	Middle management, other management	7
(9)	Employed position, working mainly at a desk	7
(10)	Employed position, not at a desk but travelling (salesmen, driver,...)	3
(11)	Employed position, not at a desk, but in a service job (hospital, restaurant, police, firemen, ...)	5
(12)	Supervisors	1
(13)	Skilled manual workers	9
(14)	Other (unskilled) manual workers, servants	5

Non-active

(15)	Responsible for ordinary shopping and looking after the home, or without any current occupation, not working	15
(16)	Student	11
(17)	Unemployed temporarily not working	5
(18)	Retired or unable to work through illness	20

Basing cross-analyses on "occupation" would exclude half of our respondents from analysis. An alternative, also used in past EUROBAROMETER reports, is to base analyses on a (non-marxist) concept of "objective social class" using the occupation of the "person who contributes most to the household income" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created : the "SOCIO-PROFESSIONAL-STATUS".

For those in paid work it is based on their own present occupation. For those not in paid work, "former occupation" was used, if applicable (retired, housewives having been in paid work in the past, temporarily not working, unemployed). For those never having been in paid work, the occupation of the "person who contributes most to the household income" was used and, if the head of household was not in paid work at the time of the interview, his or her "former occupation" was used, if applicable. SOCIO-PROFESSIONAL-STATUS is, consequently, a classification "as close to the respondent himself/herself as possible" but drawing upon additional background information to extent necessary and available, in order to dispose of a single measure of interviewees' socio-professional setting including a maximum of respondents in the respective analyses. The resulting distribution is as follows:

SOCIO-PROFESSIONAL STATUS (n = 12.800)
 (weighted percentages for EC 12+ - EB 37)

Self-employed

(a) Farmers/Fishermen	4
(b) Professionals	3
(c) Shop/Company owners	8
(d) Business proprietors, owner (full or partner) of a company	3

Employed

(e) Employed professionals	3
(f) General management	4
(g) Middle management	10
(h) Employed position, working mainly at a desk	9
(i) Employed position, not at a desk but travelling (salesmen, driver,...)	4
(j) Employed position, not at a desk, but in a service job (hospital, restaurant, police, firemen, ...)	5
(k) Supervisors	3
(l) Skilled manual workers	17
(m) Other (unskilled) manual workers, servants	6

Others (no SPS attributable)

(n) "Main income earner" never in paid work, no answer, etc	23
---	----

SUBJECTIVE SOCIAL CLASS

is asked by the question "If you were asked to choose one of these five names for your social class, which would you say you belong to ?" :

- (1) Middle class
- (2) Lower middle class
- (3) Working class
- (4) Upper class
- (5) Upper middle class
- (6) Refuses to be classified
- (7) Other
- (8) DK

Presented in tables are the following categories (with EC 12 weighted percentages from the Nr. 33 EUROBAROMETER survey of Spring 1990) :

Working	28 %
Lower Middle	11 %
Middle	44 %
Upper Middle	8 %
Upper	1 %
Other replies, n.a	8 %

100 %

EUROPEAN PARLIAMENTARY PARTY PREFERENCE

is based upon the question "If there were a General Election tomorrow (say if contact under 18 : and you had a vote), which party would you support ?" in each country in the wording usually used for this topic. Answers are grouped according to the affiliation of the representatives of the respective party to a group in the European Parliament. If a party is not represented in the European Parliament at the time the survey is carried out but had been represented before, it's supporters are grouped with the EP group their party had been affiliated with. Supporters of parties represented in the European Parliament but their Members of the European Parliament not being affiliated to any group are labelled N.I. Supporters of parties not represented in the European Parliament are labelled "other". Labels are presented in the order in which they figure in the "List of Members" of the European Parliament of October 1989. Abbreviations in tables are also taken from this publication :

S	= Socialist Group
PPE	= Group of the European People's Party (Christian Democratic Group)
LDR	= Liberal and Democratic Reformist Group
ED	= European Democratic Group
V	= Green Group
GUE	= Group for the European Unitarian Left
RDE	= Group of the European Renewal and Democratic Alliance
DR	= Group Technical of the Right
CG	= Left Unity
ARC	= Rainbow Group
NI	= Non-attached

Weighted EC - average proportion of persons not indicating a party choice ("would not vote", "spoil one's ballot", "do not answer" or "don't know") is 35 %. Consequently among those who do reply, loyal and regular supporters of the respective parties tend to be over represented.

OPINION LEADERSHIP

is based on the answers to the following two questions : (A) "When you get together with your friends, would you say you discuss political matters frequently, occasionally or never?" and (B) "When you, yourself hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? If so, does this happen often, from time to time or rarely?" <No = never>. Labels are : ++, +, -, --. Interviewees giving affirmative answers to both questions are labelled ++, Interviewees giving negative answers to both questions are labelled --. Middle categories are constituted correspondingly.

VALUE ORIENTATION

is based on the following question:

"There is a lot of talk these days about what this country's goals should be for the next ten or fifteen years. On this card are listed some of the goals that different people say should be given top priority (show card). Would you please say which of them you yourself consider most important in the long run ?" (one answer only)

"And what would be your second choice ?"

- Card :
- (1) Maintaining order in the nation
 - (2) Giving the people more say in important government decisions
 - (3) Fighting rising prices
 - (4) Protecting freedom of speech

Respondents combining item (1) and (3) are labelled "materialist", those combining items (2) and (4) are labelled "post-materialist", others are labelled "mixed" <¹> .

¹ For additional theoretical and methodological details cf. Ronald Inglehart, "The Silent Revolution. Changing Values and Political Styles Among Western Publics", Princeton University Press, Princeton, 1977.

SELF-PLACEMENT ON THE LEFT-RIGHT-SCALE

is based upon answers to the question "In political matters, people talk of the "left" and the "right". How would you place your views on this scale ? (Show card) (Do not prompt). The 10 Boxes of the card are numbered. Ring choice. If contact hesitates, ask him to try again)

Left	1	2	3	4	5	6	7	8	9	10	Right
------	---	---	---	---	---	---	---	---	---	----	-------

In this report, those who reply are grouped in tertiles of the one third of respondents placing themselves most left, the one third most right, and the centre third, for each country. The usual weighting according to each country's population aged 15 and more is applied.

CLOSENESS TO A PARTY

is based upon answers to the following question: "Do you consider yourself to be close to any particular party ? If so, do you feel yourself to be very close to this party, fairly close or merely a sympathizer?" labels were given as follows :

- +++ very close
- ++ fairly close
- + merely a sympathizer
- 0 close to no particular party

MEDIA USE

is based upon answers to the following question :

"About how often do you...

- watch the news on television ?
- read the news in the daily papers ?
- listen to news broadcasts on the radio ?

Everyday, several times a week, once or twice a week, less often, never ?"

- +++ News on TV, radio and papers every day or several times a week
- ++ Two media everyday or several times a week; the third medium, not more than once or twice a week
- One of the three media everyday or several times a week; the two others, not more than once or twice a week
- The three media no more than once or twice a week

TYPOLOGY OF EUROPEAN ATTITUDES

is based upon answers to the following questions :

- (1) Generally speaking, do you think that (your country's) membership of the European Community is : good thing; Bad thing; Neither good nor bad ? (= MEMBERSHIP)
- (2) In general, are you for or against efforts being made to unify Western Europe ? For, very much; for, to some extent; against, to some extent; against, very much (= UNIFICATION)

Positive attitudes	= Membership:	"good"
	+ Unification:	"for, very much"
		"for, to some extent"
Ambivalent attitudes	= Membership :	"neither good nor bad"
		"bad"
		No answer
	+ Unification :	"for, very much"
		"for, to some extent"
or	Membership :	"good"
		"neither good nor bad"
		No answer
	+ Unification :	"against, to some extent"
		"against, very much"
or	Membership :	No answer
	+ Unification :	No answer
Negative attitudes	= Membership :	"bad"
	+ Unification :	"against, to some extent"
		"against, very much"

TYPOLOGY OF SINGLE MARKET ATTITUDES

is based on answers to two different questions :

- a) whether respondents react to the Single Market with hope or fear and
- b) their evaluation ("good thing" - "bad thing") of the Single Market. The Typology combines answers to those two questions in the following way :

Positive = Q.a "very hopeful"
 or Q.a "rather hopeful"
 and Q.b "a good thing"

Ambivalent = Q.b "neither good nor bad thing"

Negative = Q.a "rather fearful"
 or Q.a "very fearful"
 and Q.b " a bad thing"
